16th European Solar Physics Meeting

Wednesday, 8 September 2021

Poster Session 7.5 (14:00 - 15:31)

-Conveners: Alessandro Bemporad

time	[id] title	presenter
14:00	[482] Three Eruptions Observed by EUI Onboard Solar Orbiter	Dr MIERLA, Marilena
14:13	[273] Multi-wavelength Observations of Electron Acceleration in a Series of Solar Microflares	Dr BATTAGLIA, Marina
14:26	[187] The Spatial and Temporal Variations of Turbulence in a Solar Flare	STORES, Morgan
14:39	[210] On the possibility of probing the flare productivity of an active region in the early stage of emergence	KUTSENKO, Olga
14:52	[332] Early results of the image reconstruction problem from STIX data	MASSA, Paolo
15:05	[153] White-Light Solar Flares as Potential Clues for Stellar Superflares	ROMANO, Paolo
15:18	[319] Hot X-ray Onsets of Solar Flares	SIMÕES, Paulo
