Telescope and Instrument Software and Control Activities at INAF Capodimonte TESTA lab

Tuesday 27 October 2020 11:40 (20 minutes)

We provide an overview of the software and control activities of the group, active in the last three decades in the field of telescopes and astronomical instrumentation control, in past and current projects. These works include deeply related tasks of control software, control electronics and control engineering as well as data handling activities, performance monitoring and control algorithms design, software implementation and tuning.

Primary authors: SCHIPANI, Pietro (Istituto Nazionale di Astrofisica (INAF)); CAPASSO, Giulio; COLAPIETRO, Mirko; MARTY, Laurent; D'ORSI, Sergio; PERROTTA, Francesco; SAVARESE, Salvatore

Presenter: SCHIPANI, Pietro (Istituto Nazionale di Astrofisica (INAF))

Session Classification: Overview 2
