The Instrumentation Control Group of Inaf-OATs: a brief overview of experiences and activities

Tuesday 27 October 2020 09:30 (20 minutes)

In this talk I'll present the Instrumentation Control Group of INAF-OATs focusing on the experiences gathered by the group in participating in several national and international projects spanning a period of several decades in the field of astronomical instrumentation. The know-how achieved covers, among others, topics related to control software, control electronics, software system engineering, software design methodologies, integration and commissioning activities. During the talk I'll give a quick survey of the most important projects we participated in and I'll conclude the overview presenting our current and foreseen future activities.
