

INAF OAAB
Hardware e Software strumentale

Matteo Di Carlo on behalf of
Matteo Canzari

Gruppi di lavoro:

LOFAR

SKA Cream Team

Adaptive Optical and VIS/NIR
Instrumentation team

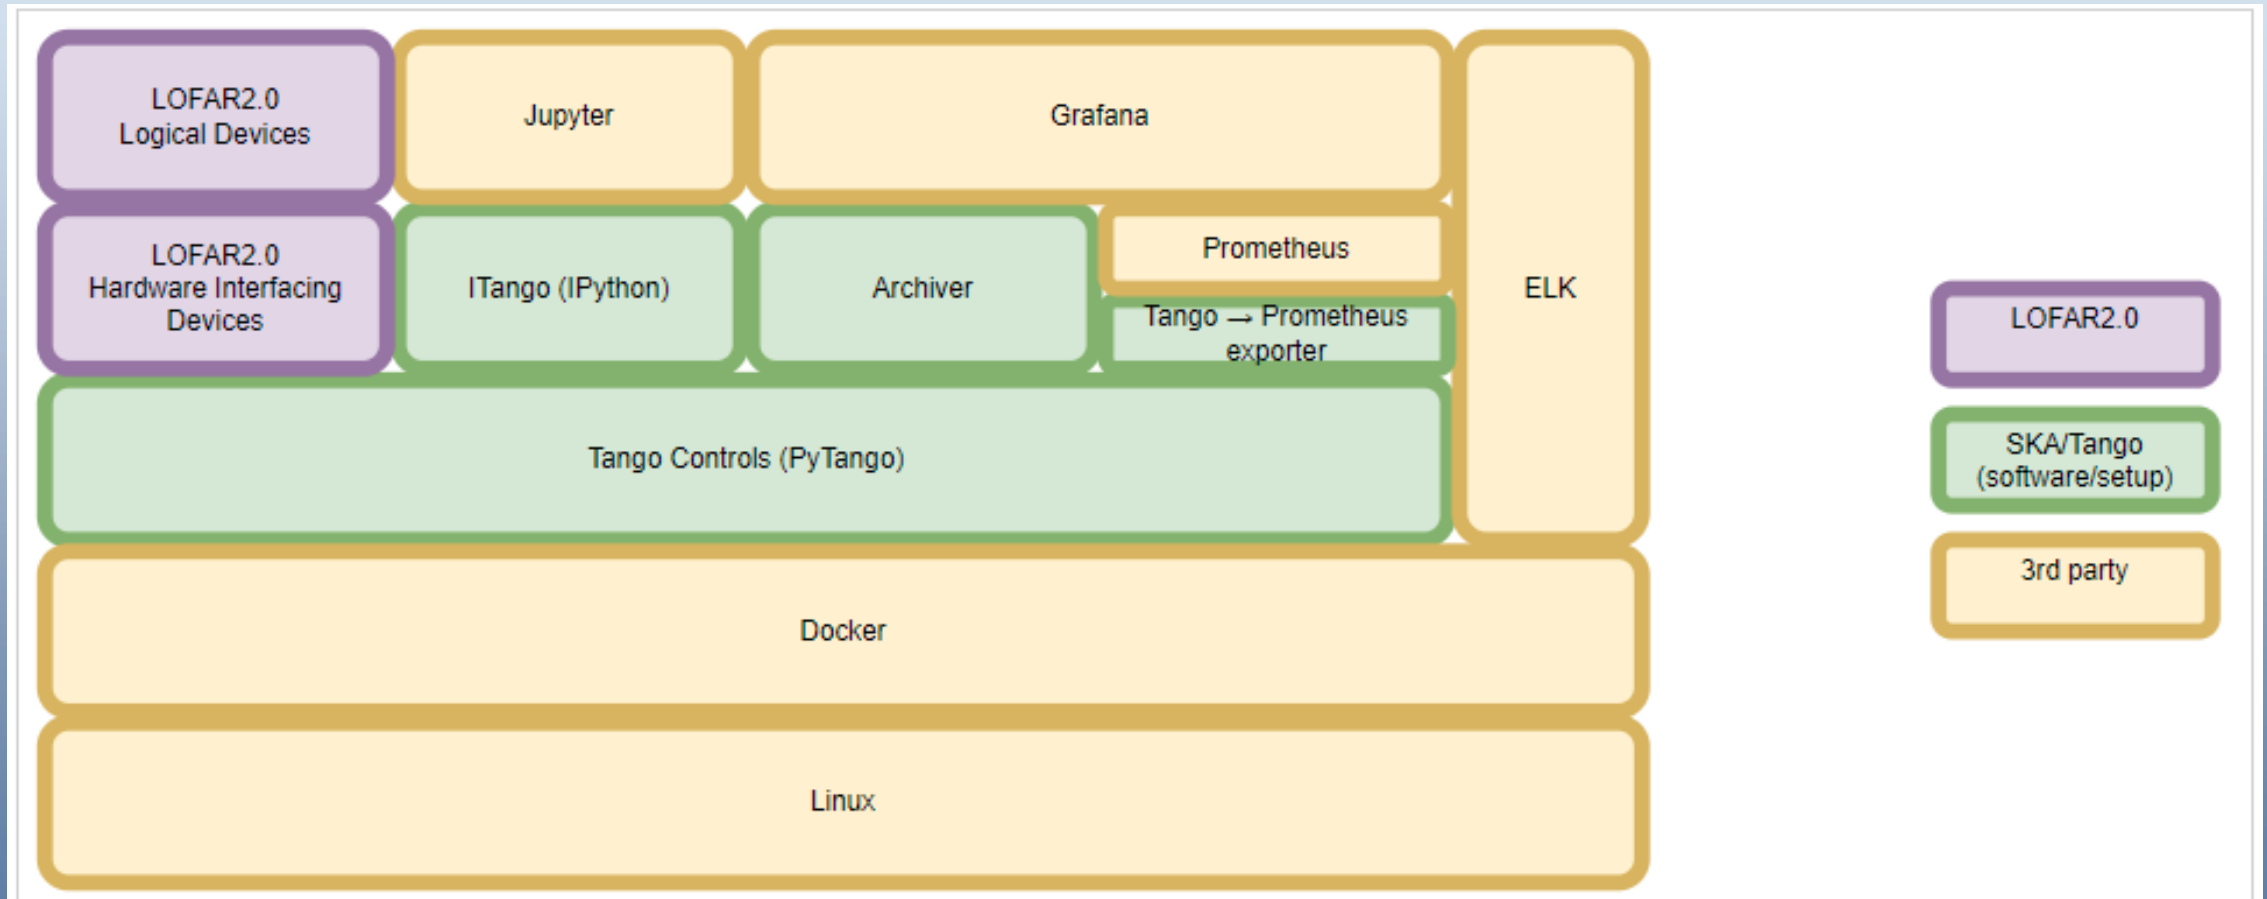

Expertises

- **Agile** software development process
- Tango Controls development @SKA & @LOFAR
- Tango **archiving** (MySQL, TimescaleDB)
- Station Monitor&Control **GUI** (Grafana)

- Web development for control system interfaces
- UI/UX analysis and design
- Artificial Intelligence
- Member of the Tango **Steering committee**

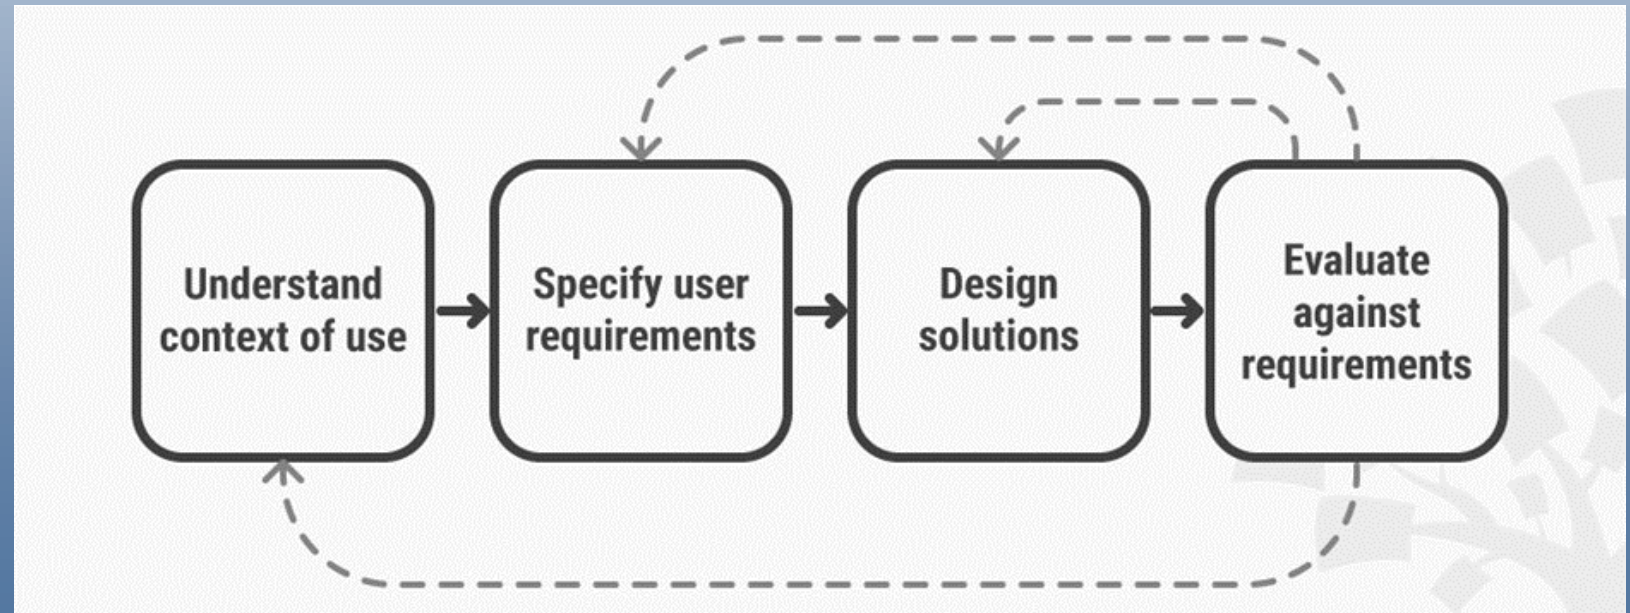

LOFAR 2.0 Software & Architecture

UI/UX analysis and design

- **Analysis** of UI user requirements
- **User-centered design** approach
- Designing UI/UX using different techniques such as **mockups**, **diagrams...**

Web development

- **Taranta** is a **web** application that allows a user to **explore Tango devices** and to **create a graphical user interface** to interact with them
- **Taranta** development (design, front-end/back-end development, testing, documentation, support ecc...)
- **Collaboration** with **external institutes** and the **Tango community**
- **Support** users developing dashboards in the integration environment

Artificial Intelligence

- **Deep Learning** methodologies in **spectra classification**
- Early study for using **AI in a control system**

Instrument Control Systems

- PLC based (VLT & ELT frameworks), real-time control of multiple devices
- Motion Control (all motors and actuators technology, tuning, positioning & tracking loop)
- Monitoring, telemetry data & housekeeping (probes & sensors)
- Vendors & open industrial standards (communication, digital & analog signals)
- Harsh environments (High-Availability, Redundancy and Fail-Over) and cryo-vacuum systems

- Design, integration, test & verification
- Electronics Design: OrCAD, Altium Designer
- Multiplatform IDE for firmware, RT and user-level source code development (ST,C++,Python)

- Breadboarding & prototyping, climatic chamber tests (P-RH-T)
- special cabling & fiber termination

VIS/NIR HW&SW Group:

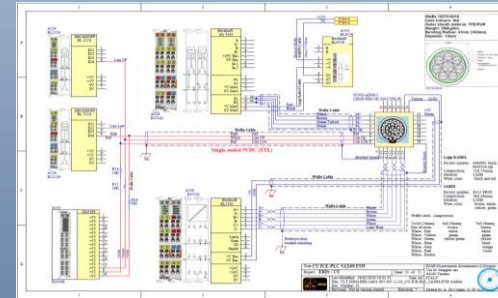

- S. Benedetti
- A. Di Cianno
- G. Di Rico
- A. Valentini

Current Projects:

- ✓ ERIS AO & CU
- ✓ MAORY CU
- ✓ GW follow-up (OAAb telescopes)

New involvements (TBC):

- ET & LGWA
- SHARP@ELT
- ORCAS (Nanosat+GroundAO)

Thanks
