Effect of a primordial magnetic field on a warm inflation scenario.

Tuesday, 24 January 2023 11:30 (20 minutes)

I will present a review of the effects that a primordial magnetic field present during the inflationary epoch can have on a warm inflation scenario, both on the effective potential and on the inflaton decay process.

Presenter: PICCINELLI BOCCHI, Gabriella (Centro Tecnológico, FES Aragón, Universidad Nacional Autónoma de México)
