

# Fifth Workshop on Millimetre Astronomy in Italy

## Wednesday, 14 June 2023

### Galaxies and AGNs (11:25 - 12:05)

time	[id] title	presenter
11:25	[45] Stefano Carniani - CGM enrichment by quasar-driven outflows	
11:45	[46] Federico Lelli - Cold gas dynamics in high-z galaxies	

### Galaxies and AGNs (14:20 - 15:40)

time	[id] title	presenter
14:20	[50] Toby Devereaux - Star-forming clumps and their molecular gas content	
14:40	[51] Francesca Perrotta - H <sub>2</sub> O emission lines in a strongly lensed dusty star-forming galaxy at $z \approx 3.1$	
15:00	[52] Gayathri Gururajan - Probing the gas reservoirs of high-redshift lensed dusty	
15:20	[53] Marika Giuliotti - Synergistic Study of High-z Strongly Lensed Dusty Star-Forming Galaxies with ALMA: Insights into Galaxy/AGN Co-evolution
