The XVth Italian AGN meeting is set to uphold a three-decade-long tradition, and will delve into a range of topics, including:

1. The Central Engines of AGN, accretion and ejections (including relativistic jets), and analogies with stellar mass black holes
2. The Circum-nuclear Regions
3. Coevolution of Black Holes and Galaxies and AGN Feedback
4. Time domain and variability studies
5. Multi-messenger Studies and multi-wavelength Surveys, including gravitational wave and neutrino astronomy
6. Perspectives offered by the ground and space based instrumentation under development with Italian participation
7. Large Scale Environment, High-z AGN and Cosmology
