

AGN 15

Saturday, 23 September 2023 - Friday, 27 September 2024

Padua

Scientific Programme

The Central Engines of AGN

The Circumnuclear Regions

Coevolution of Black Holes and Galaxies and AGN Feedback

Time domain and variability studies

Perspectives offered by the ground and space based instrumentation under development with Italian participation

Multimessenger Studies and multiwavelength surveys

Large Scale Environment, high-z AGN and Cosmology
