

## Synergies with space-based transit surveys

*Wednesday, 17 January 2024 15:25 (20 minutes)*

Several space missions dedicated to transit surveys (TESS, PLATO) or, more in general, dealing with transit-based exoplanetary science (CHEOPS, JWST, Ariel) are currently flying or being developed. While their timelines are not going to overlap with GaiaNIR, it is worth exploring what are the scientific synergies in this field, in both ways.
