

LXV Congresso nazionale della Società Astronomica Italiana

Tuesday, 4 June 2024

Galassie e Cosmologia - Auditorium Nazionale INAF "Ernesto Capocci" (09:00 - 10:35)

-Conveners: Bianca Maria Poggianti

time	[id] title	presenter
09:00	[12] Ongoing and Upcoming Breakthroughs in the Field of Galaxies and Cosmology	GILLI, Roberto
09:25	[78] Sardinia Radio Telescope - Attese nel campo della radioastronomia extragalattica	GOVONI, Federica
09:45	[112] Not all the action is in clusters: environmental effects on field galaxies	VULCANI, Benedetta
10:05	[68] The Low Surface Brightness Universe: studying the Intra-Cluster Light in groups and clusters of galaxies	Dr RAGUSA, Rossella
10:20	[89] Constraining cosmology and astrophysical feedback processes with CAMELS simulations	BUSILLO, Valerio

Galassie e Cosmologia - Auditorium Nazionale INAF "Ernesto Capocci" (11:05 - 13:00)

-Conveners: Bianca Maria Poggianti

time	[id] title	presenter
11:05	[85] Euclid: a terapixel window on cosmic history	GRANETT, Benjamin Rudolph
11:25	[83] An investigation of galaxies at extreme redshifts with deep NIRCam and NIRSpect observations	CASTELLANO, Marco
11:45	[145] The centre of the Milky Way	SORMANI, Mattia
12:05	[106] Unveiling galaxy mass assembly via strong gravitational lenses with Euclid	TORTORA, Crescenzo
12:20	[87] AGN feedback in a nutshell: the multi-phase, sub-pc to galaxy-scale outflows in PDS 456, the most luminous quasar in the local Universe	PICONCELLI, Enrico
12:35	[23] Discussion
