

TOSCA - Topical Overview on Star Cluster Astrophysics

Monday 28 October 2024

Gamma-ray observations (14:35 - 18:35)

-Conveners: Gaia Verna

| time | [id] title | presenter |
|-------|---|-------------------|
| 14:35 | [10] Review Gamma Rays | Dr TIBALDO, Luigi |
| 15:15 | [12] Recent results on Stellar clusters as detected by HESS | MOHRMANN, Lars |
| 15:45 | [13] Young massive clusters with Fermi-LAT | PERON, Giada |
| 16:15 | Coffe break | |
| 16:35 | [11] Overview of the Cygnus OB2 region in gamma-rays | YANG, ruizhi |
| 17:05 | [14] Population studies of SCs derived from Fermi-LAT observations | WEBBER, Ava |
| 17:35 | [15] Prospect for gamma-ray detection of Galactic stellar clusters | MITCHELL, Alison |
| 18:05 | [22] Aluminium-26 from massive star clusters: theory and observations | DIEHL, Roland |
