

Molecules and planets in the outer Galaxy: is there a boundary of the Galactic Habitable Zone?

Tuesday 12 November 2024

Session-2: Planets and planet formation at sub-Solar metallicity: observations - Sala Capitolo (12:15 - 12:45)

time	[id] title	presenter
12:15	[28] The metallicity content of planet-host stars: the Ariel reference sample	TSANTAKI, Maria

Session-2: Planets and planet formation at sub-Solar metallicity: observations - Sala Capitolo (14:30 - 16:00)

time	[id] title	presenter
14:30	[29] Chemical abundances of stars hosting planets	DELGADO MENA, Elisa
15:00	[30] From primordial composition of stars to the present-day composition of their rocky exoplanets	Dr SOARES, Barbara ADIBEKYAN, Vardan
15:30	[31] STILES: the Impact of stellar XUV radiation on exoplanetary atmosphere evolution	LOCCI, Daniele
