

Celebrating 20 years of Swift Discoveries

Friday 28 March 2025

AGN: accretion and outflows, blazars and jets (09:00 - 10:30)

time	[id] title	presenter
09:00	[205] X-ray/UV/optical continuum reverberation mapping in AGN with Swift	Dr CACKETT, Ed
09:30	[171] The legacy of Swift-BAT: A complete census of the heavily obscured AGN population in the local Universe	MARCHESI, Stefano
09:50	[140] Too many or just right? Massive jetted quasars in the early Universe	SBARRATO, Tullia
10:10	[195] A first time in the history of astronomy: Observing the formation and evolution of a radio jet from a super massive black hole in real time.	CENKO, Brad
