

Exoplanets in Italy: status and perspectives

Wednesday 26 February 2025

Planet Formation and Observations of Infant Planets (10:00 - 11:30)

time	[id] title	presenter
10:05	[1] Protoplanetary Disks and the Dawn of Planets	TESTI, Leonardo
10:30	[2] Orbital architectures of Jupiter-mass exoplanets: the role of planet migration in protoplanetary discs	SCARDONI, Chiara E.
10:45	[3] Evidence of disc instability in the planet forming disc of AB Aur	LODATO, Giuseppe
11:00	[4] Direct imaging of accreting protoplanets	Dr ANTONIUCCI, Simone
11:15	[5] Planet formation with ERIS - report of the INAF ERIS GTO program	FEDELE , Davide

Planet Formation and Observations of Infant Planets (11:50 - 13:00)

time	[id] title	presenter
11:50	[6] Planet formation from the Solar System to Exoplanetary System	MORBIDELLI, Alessandro
12:15	[7] Multiple planets perturbations on the dust in a circumstellar disk	MARZARI, Francesco
12:30	[8] Unlocking the Potential of High-Resolution Spectroscopy for Protoplanet Research: Insights from synthetic observations	PENG, Jiacheng
12:45	[9] Rethinking the proto-planetary disc turbulent paradigm	ROSOTTI, Giovanni
