NeuroStarMap Status Report

Thursday 29 May 2025 11:30 (15 minutes)

In this update, we would like to report on the progress of the NeuroStarMap project, which aims to enable astronomers to obtain more reliable estimates of stellar and cosmological distances. Specifically, we will discuss the neural networks implemented as an initial approach to the project, their results, and the data preparation process that led to them.

Presenter: TORTORA, Stefano (Alten)
