

## **Session Program**

**25-27 Mar 2026**

## **On the shoulders of giants**

### ***Cold Jupiters OR inner low-mass planets: statistical properties***

Archivio di Stato - Torino, Italy  
Piazza Castello 209 - 10124 Turin

## Wednesday 25 March

16:50

### **Cold Jupiters OR inner low-mass planets: statistical properties**

**Session** | **Location:** Archivio di Stato - Torino, Italy, Piazza Castello 209 - 10124 Turin

16:50–17:15

#### **Cold Jupiters and the Architecture of Planetary Systems: What We Know and What We Miss (invited talk)**

**Speaker**

Dr Anne-Marie Lagrange

17:15–17:35

#### **Cold Jupiters around intermediate-mass stars: occurrence rates from a 20-year CORALIE RV survey**

**Speaker**

Dr Emile Fontanet

17:35–17:55

#### **Long-term evolution of cold Jupiter magnetism**

**Speaker**

Dr Daniele Viganò

17:55

## Thursday 26 March

09:00

### Cold Jupiters OR inner low-mass planets: statistical properties

**Session** | **Location:** Archivio di Stato - Torino, Italy, Piazza Castello 209 - 10124 Turin

09:00–09:25

#### Demographics of sub-Neptunes at Short Orbital Periods, and out to the Habitable Zone (invited talk)

**Speaker**

Dr Gijs Mulders

09:25–09:45

#### Constraining the Migration Channels of Warm Jupiters Using Population-Level Eccentricities

**Speaker**

Dr Marvin Morgan

09:45
