USC-C General Assembly - Trieste

Monday 9 March 2026 - Friday 13 March 2026

Trieste - Savoia Excelsior Palace

Scientific Program

USC-C Scientific Program:

The Scientic Program will develop in a series of sessions, usually running from 09:00 to 18:30 with a break for the lunch. On the first and on the last day, the starting and end time are re-adjusted.

The content of the sessions will cover highligths on HPC, Quantum Computing, Archives, Analysis & Visualization Software, Controls, as well as the INAF involvement with industries and a report about the INAF main projects.

There will also be several sessions focused on the AI, analyzed from different perspectives and purposes. A special plenary session will be held by the INAF General Director Gaetano Telesio and by the INAF researcher Giulio Capasso to disseminate the importance of the AI in our daily activities.

Finally, parallel sessions and training sessions are planned both at the meeting venue and at the INAF-OATs.

A special topic will be held on Thursday afternoon on the closing event of the "Indagine di Mercato" for the Big Data Storage.
