

Session Program

14-19 Jun 2026

Active Galactic Nuclei XVI: A Sea of Discoveries

S9 - Current and Future Facilities for AGN Science: Discussing the implementation and scientific exploitation of major current and future space-based and ground-based facilities with Italian involvement, focusing on maximizing their impact on AGN studies

Brindisi, Sala Conferenze presso Autorità di Sistema Portuale

Monday 15 June

16:15

S9 - Current and Future Facilities for AGN Science: Discussing the implementation and scientific exploitation of major current and future space-based and ground-based facilities with Italian involvement, focusing on maximizing their impact on AGN studies

Session | Location: Brindisi, Sala Conferenze presso Autorità di Sistema Portuale

16:15-16:35

(Highlight) Millimeter and Infrared Probes of Active Galactic Nuclei: From ALMA to the Future Infrared mission PRIMA

Speaker

Francesca Pozzi

16:35

Friday 19 June

12:35

S9 - Current and Future Facilities for AGN Science: Discussing the implementation and scientific exploitation of major current and future space-based and ground-based facilities with Italian involvement, focusing on maximizing their impact on AGN studies

Session | Location: Brindisi, Sala Conferenze presso Autorità di Sistema Portuale

12:35-12:55

(Highlight) The Cherenkov Telescope Array Observatory and its gamma-ray view on Active Galactic Nuclei

Speaker

Giacomo Bonnoli

12:55

14:20

S9 - Current and Future Facilities for AGN Science: Discussing the implementation and scientific exploitation of major current and future space-based and ground-based facilities with Italian involvement, focusing on maximizing their impact on AGN studies

Session | Location: Brindisi, Sala Conferenze presso Autorità di Sistema Portuale

14:20-14:40

(Highlight) Investigating AGN in the SKA Era

Speaker

Isabella Prandoni

14:40-15:00

(Highlight) NewAthena

Speaker

Luigi Piro

15:00-15:20

(Highlight) KM3NeT/ARCA: status, recent results and perspectives for AGN studies

Speaker

Dr Simone Biagi

15:20-15:40

(Highlight) The IXPE revolution in AGN: from the hot corona to the torus

Speaker

Dr Vittoria Elvezia Gianolli

15:40-16:00

(Highlight) The AGN content in eRASS/DR1 and eRASS/DR2

Speaker

Mara Salvato

16:00
