

## **Session Program**

**10-12 Feb 2026**

# **Multimessenger astronomy in the Einstein Telescope Era**

## ***EM facilities in the future***

Padova  
Palazzo della Salute, Via San Francesco 90

## Tuesday 10 February

17:10

### EM facilities in the future

**Session** | **Location:** Padova, Palazzo della Salute, Via San Francesco 90 | **Convener:** Giulia Stratta

17:10–17:20

#### Quick Ultra Violet Kilonova surveyor (QUVIK): a UV mission to study transient and GW counterparts

**Speaker**

Giancarlo Ghirlanda

17:20–17:35

#### Multi-messenger astrophysics and cosmology with THESEUS in synergy with GRAWITA

**Speaker**

Lorenzo Amati

17:35–17:45

#### Multimessenger science with NewAThena

**Speaker**

Luigi Piro

17:45–18:00

#### The revolution of the Square Kilometre Array on Gamma-Ray Burst studies

**Speaker**

Stefano Giarratana

18:00–18:15

#### Fast and Slow(er) Radio Transients: the road from radio only to the full picture

**Speaker**

Maura Pilia

18:15–18:30

#### Discussion

**Speaker**

Riccardo Ciolfi

18:40

## Wednesday 11 February

09:00

### EM facilities in the future

**Session** | **Location:** Padova, Palazzo della Salute, Via San Francesco 90 | **Convener:** Nancy Elias-Rosa

09:00–09:10

#### **ASTRI Mini-Array: Current Status and Transient Observation Strategies**

**Speaker**

Andrea Bulgarelli

09:10–09:25

#### **Transients at the highest energies and multi-messenger observations with CTAO.**

**Speaker**

Antonio Stamerra

09:25–09:40

#### **The ELT Perspective on Multi-Messenger Astronomy**

**Speaker**

Francesca Annibali

09:40–09:50

#### **MezzoCielo: a novel ultra-wide field telescope for all-sky transient phenomenas**

**Speaker**

Demetrio Magrin

09:50–10:05

#### **The Wide-field Spectroscopic Telescope (WST)**

**Speaker**

Sofia Randich

10:05–10:25

#### **Discussion**

**Speaker**

Paolo D'Avanzo

10:25
