

Meeting INAF-Macroarea 2: Stelle, popolazioni stellari e mezzo interstellare

Thursday, 16 June 2016

Formazione stellare locale e globale: Parte 1 - aula C (10:05 - 11:05)

time	[id] title	presenter
10:05	[17] Astrochemistry @ INAF	CODELLA, Beltran
10:20	[18] JEDI: Jets and Disks at INAF	NISINI, Brunella
10:35	[23] The earliest stages of massive star and stellar clusters formation: turbulence and fragmentation	TRAFFICANTE, FONTANI, OLMI
10:55	[20] Alta risoluzione spettrale e spaziale in NIR per accretion, ejection	MASSI, Fabrizio

Formazione stellare locale e globale: Parte 2 - aula C (11:25 - 12:40)

time	[id] title	presenter
11:25	[21] SRT: contributo per formazione stellare e chimica interstellare	CASU, Silvia
11:35	[22] Jet - disk interaction: a key element in star/planet formation	BACCIOTTI, MOSCADELLI
11:50	[19] ALMA and the search for disks around OB-type (proto)stars	CESARONI, GALLI
12:05	[34] Demographics of galactic dense clumps and the evolutionary path of high mass star formation	ELIA, MERELLO
12:17	[35] Toward a full comprehension of the early phases of star formation with Herschel data	BENEDETTINI, PEZZUTO
12:29	[36] Dusty filamentary structures in the Milky Way: Funneling matter from diffuse ISM to star-forming condensations	SCHISANO, Eugenio
