

Và dove ti porta Nilde: bilancio e prospettive del servizio

di Francesca Brunetti

SBA WORKSHOP 2016
TRIESTE, 16/17 NOVEMBRE 2016
STAZIONE MARITTIMA

Dove eravamo rimasti...

- ACNP and NILDE make accessible and visible the holdings of IAL to all the other libraries.
- **Among IAL, they are the most important channels for requesting DD of non-astronomical subjects (Physics, Geophysics).** They allow libraries to locate and furnish information not easily accessible to the astronomers. For astronomical papers, the primary sources that fulfill the needs of the astronomers are the web resources: ADS
- **NILDE is a valuable tool for journal subscription renewal and cancellation.** Through the reports generated by NILDE, it is possible to know qualitative information about the exchanges made by each single IAL and of INAF as a whole. A function that allows for **the analysis of trends in sharing resources and for planning for the future.**
- Finally, they represent a **means for the collaboration and for sharing resources between libraries.**

A che punto è

NILDE

Network Inter-Library Document Exchange

896 biblioteche 96% italiane

691 universitarie 77%

68 ricerca 8%

ambito disciplinare : 289 tecnico-scientifico 32%

15 anni : NILDE ha superato i 2 milioni di documenti richiesti tra le biblioteche del network.

tasso di successo è 87%

tempi di consegna 0,5 giorni.

Cosa è e come usarlo ?

*Io cerco la "Nildina" ... ovvero come sopravvivere alla ricerca di un articolo e vivere felici con NILDE
di Luisa Schiavone*

Top twenty: lending 2013/2016

- | | | |
|---|--|-----------------------------------|
| ■ Proceedings of SPIE | ■ Journal of Biomedical Optics | ■ Applied Spectroscopy |
| ■ JOSA | ■ Applied Optics | ■ Science |
| ■ Nature | ■ New Scientist | ■ Astrobiology |
| ■ Icarus | ■ Optics Letters | ■ Journal of Geophysical research |
| ■ Geophysical Research letters on line | ■ Annual Review of Earth and Panetary Sciences | ■ Journal on Nanophotonics |
| ■ Journal of Applied Remote Sensing | ■ Physics of Fluids | ■ ESA Scientific Reports |
| ■ Geophysiacal and Astrophysical Fluid Dynamics | ■ Geophysical Journal RAS | |

Top Twenty: borrowing 2103/2016

- Nature
- Physical Review
- Journal of high energy astrophysics (Online)
- Journal of cosmology and astroparticle physics
- Physica scripta
- Philosophical transactions - Royal Society. Mathematical, physical and engineering sciences (Online)
- IEEE transactions
- Journal of geophysical research
- Physics reports
- Nuclear instruments & methods in physics research. Section A, Accelerators, spectrometers, detectors and associated equipment (Online)
- International journal of astrobiology (Online)
- Journal of instrumentation
- Radio science
- Science (Washington, D.C.)
- Serials review
- Journal of chemical physics online
- Astrophysics
- Icarus
- Meddelanden fran Lunds Astronomiska Observatorium
- Physical review letters
- Planetary and space science
- Lecture notes in Physics

Dove vogliamo andare?

1) costo adesione biblioteche

NILDE 2015 : 1327,36 € IVA compresa

NILDE 2016 : 1593,32 € IVA compresa

costo per articolo per ns utenza 2015 : $1327,36 : 203 = 6,5$ + costo del lavoro

potremmo utilizzarlo meglio? In modo diverso ? WEB, Giornata nazionale INAF/italiana NILDE?

MyNilde?

Modelli a confronto : distribuito /centralizzato (* esperienza Arcetri ?!?)

suggerimenti

2) analisi delle richieste e delle forniture = spunti per i rinnovi

3) postilla

Grazie !!!

Francesca Brunetti
