

Protoplanetary disks

Wednesday, 27 June 2018

Protoplanetary disks (chair R. Garcia Lopez) (09:00 - 13:15)

time	[id] title	presenter
09:30	[45] Disks ALMA observations and dust evolution (I)	TAZZARI, Marco
10:00	[47] Gas and dust connection in protoplanetary disks (I)	MIOTELLO, Anna
10:30	Coffee break	
11:00	[53] ALMA view of protoplanetary disks	FEDELE, Davide
11:15	[58] Towards the molecular complexity in protoplanetary disks	FAVRE, Cecile
11:30	[51] Understanding planet formation: looking at «teenage» giant planets (I)	D'ORAZI, Valentina
12:00	[34] On The Secular Evolution of GG Tau A Circumbinary Disc: A Misaligned Disc Scenario	HOSSAM, Aly
12:20	[20] Can spirals and axisymmetric structures give us a proxy for the total disc mass? The case of HD135344B	VERONESI, Benedetta
12:40	Discussion on disks (Giuseppe Lodato moderator)
