Micromed: Innovative tool for measuring the abundance and size of dust suspended in the atmosphere of Mars.

Letter of support

On behalf of Regione Campania, I hereby notify that the Regione Campania fully supports the initiative Micromed: Innovative tool for measuring the abundance and size of dust suspended in the atmosphere of Mars. In order to Announcement of Opportunity for European payload elements on the Surface Platform of the ExoMars 2018 mission.

The Micromed proposal is completely aligned with the vision of the Campania region for this field of science.

Regarding Micromed, the Campania Region is fully committed to supporting the development expertise in this field of science. Furthermore, the Campania Region will work to ensure the support of national institutions of selected projects and consistent with the document RIS3 regional. It also noted that in the proposed ERDF Campania 2014/20, sent to the European Commission, have been planned financial resources to support this type of project.
