Type: **Review**

Physics of AGN

Wednesday, 11 September 2019 10:10 (30 minutes)

Recent advances in the physics of AGN will be discussed, including the likelihood that the pair thermostat operates and controls the temperature of the corona. Also new high density reflection models now give improved fits to X-ray spectra of AGN with black hole masses below 100 million M_{sun} , enabling the surface density of the disk to be determined.

Topic

Active Galactic Nuclei: accretion physics and evolution across cosmic time

Affiliation

University of Cambridge UK

Primary author: FABIAN, Andrew

Presenter: FABIAN, Andrew

Session Classification: ACTIVE GALACTIC NUCLEI
