Calibrating ESA's Athena mission

Friday, September 13, 2019 8:04 PM (2 minutes)

ESA's Athena mission is due for launch in the early 2030's. The calibration of its optics and instruments is, nevertheless, already subject of several studies and plans. This poster summarises the current calibration baseline of the telescope, the X-IFU micro-calorimeter, and the Wide-Field Imager.
