

# Science with multi-object spectrographs: perspectives and opportunities for the Italian community

## Wednesday, 12 December 2018

### Session 2: EXTRAGALACTIC - TBD (15:15 - 18:50)

time	[id] title	presenter
15:15	[14] WEAVE: Extragalactic Surveys	IOVINO
15:35	[12] Extragalactic surveys with MOONS	MANNUCCI
15:55	[11] An introduction to the VANDELS survey and first results	TALIA
16:15	[16] A large spectroscopic survey of galaxies in the reionization era	CASTELLANO
16:25	Coffee Break	
16:55	[15] Cosmology with spectroscopic redshift surveys: VIPERS and beyond	GRANETT
17:15	[13] Euclid Legacy Science	CIMATTI
17:35	[17] Identification of single line emitters in the HST/WFC3 Infrared Spectroscopic Parallel Survey (WISPs)	BARONCHELLI
17:45	[18] The Deep (photometric and spectroscopic) Surveys of the Fornax Cluster	IODICE
17:55	[19] The build-up of dense and normal massive passive galaxies	GARGIULO
18:05	[20] The J1030 deep survey: an INAF legacy field	GILLI
18:15	[21] The GASP Large Programme with MUSE and its and multi-wavelength follow ups	GULLIEUSZIK
18:25	[22] Reconstruction of Galaxy physical properties and Star Formation Histories: from VANDELS to WEAVE/STEPS and MOONS	POZZETTI
