

# ***ACDC run1***

what we are learning

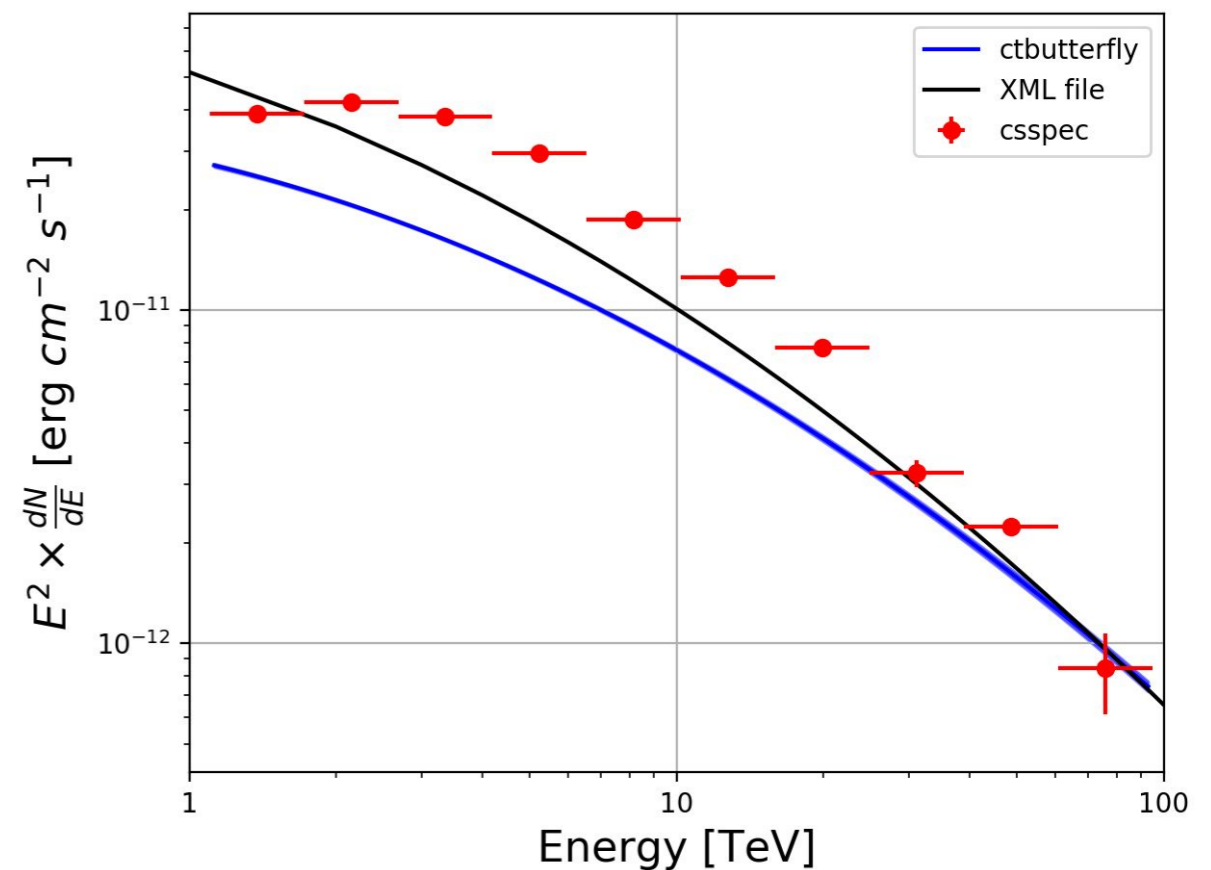

A.Giuliani , F.Pintore

and the Sgamati group

# ACDC1: Energy dispersion

ACDC1 has been produced with the energy dispersion.

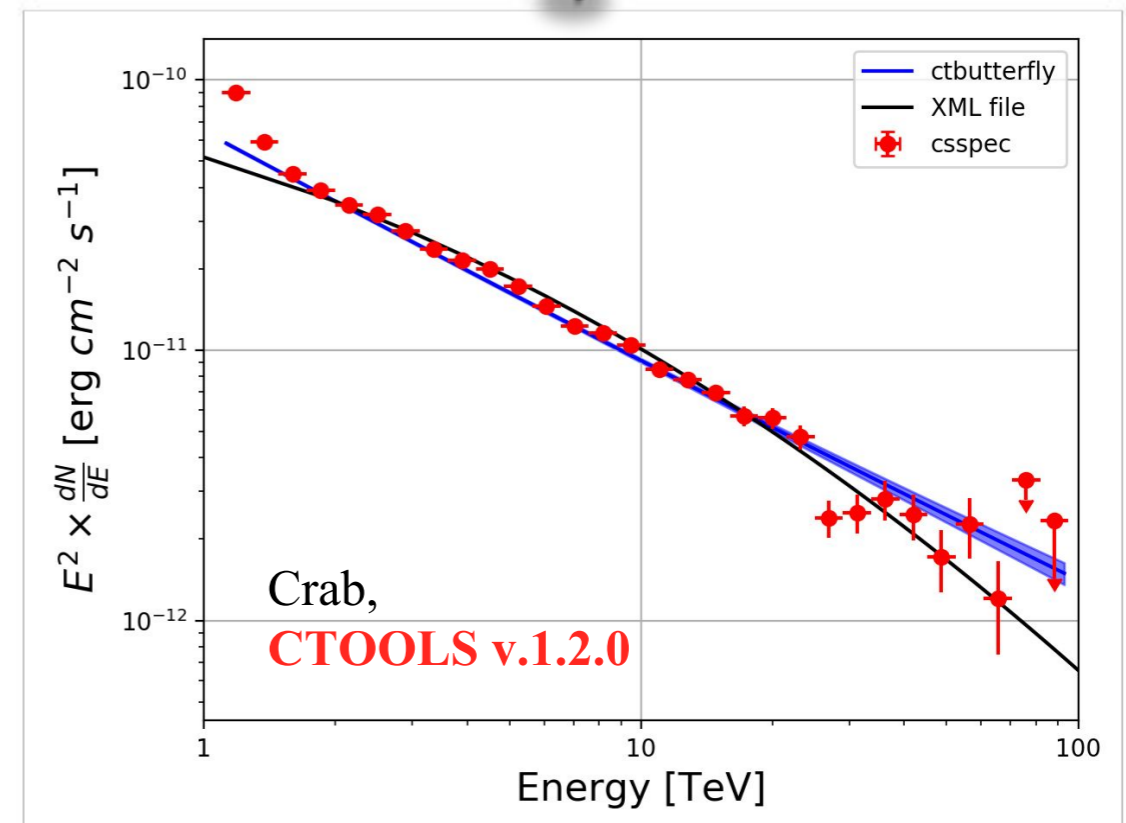

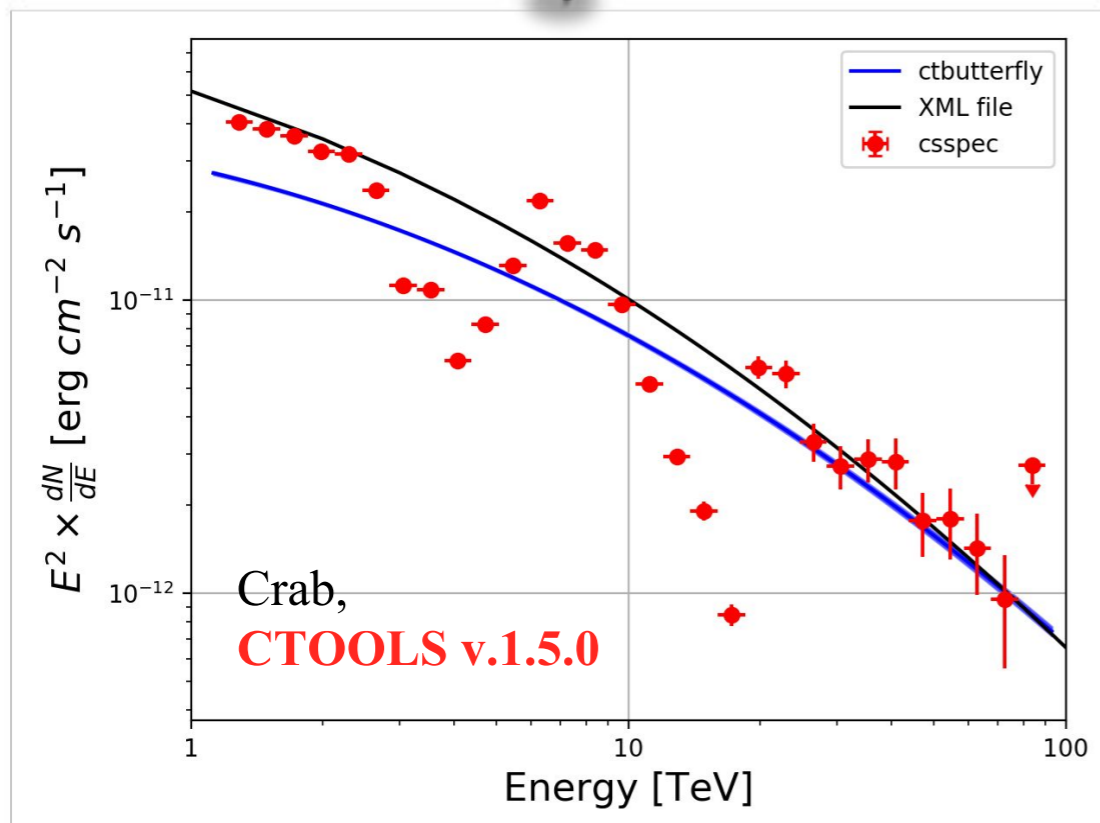

It has to be included in all the analyses.

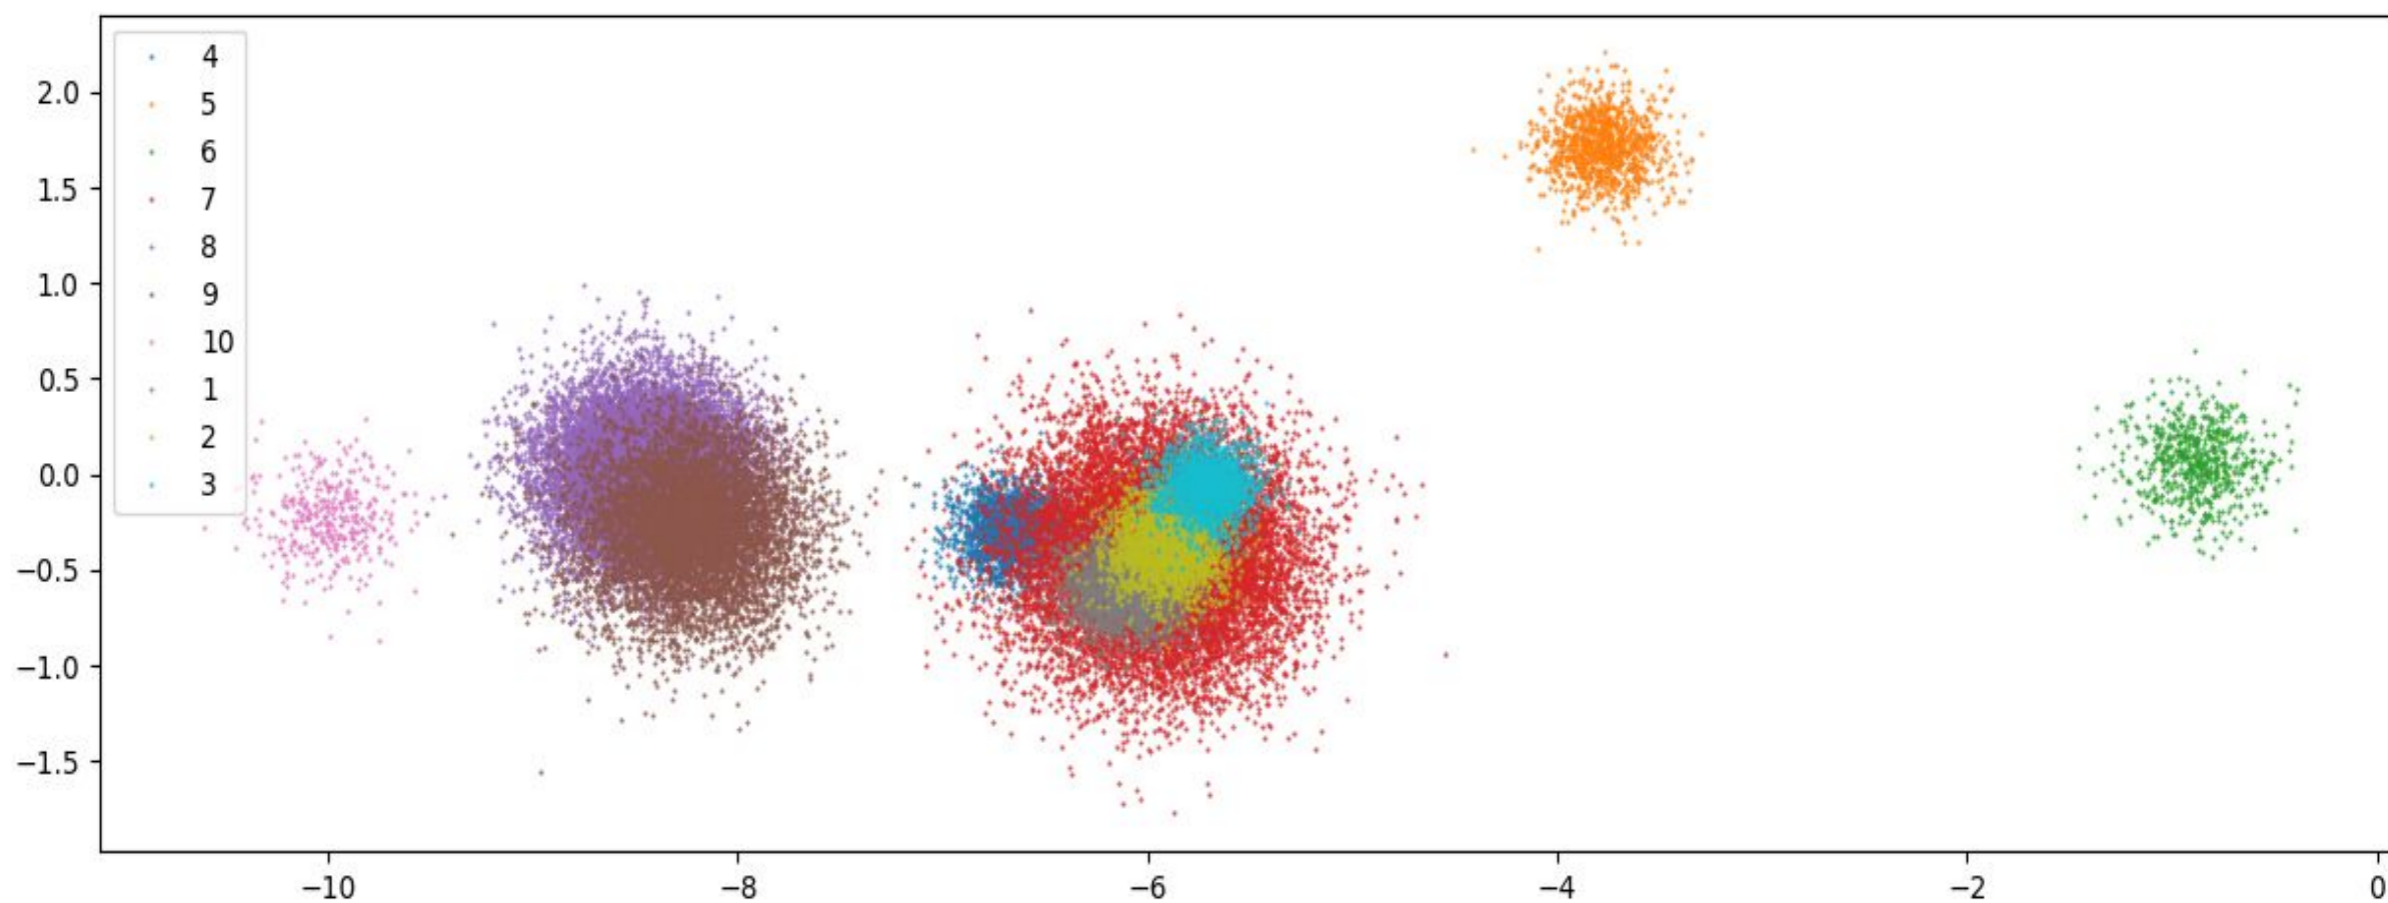

# CTOOLS version

It is necessary to use the latest CTOOLS version (v. 1.5.2);

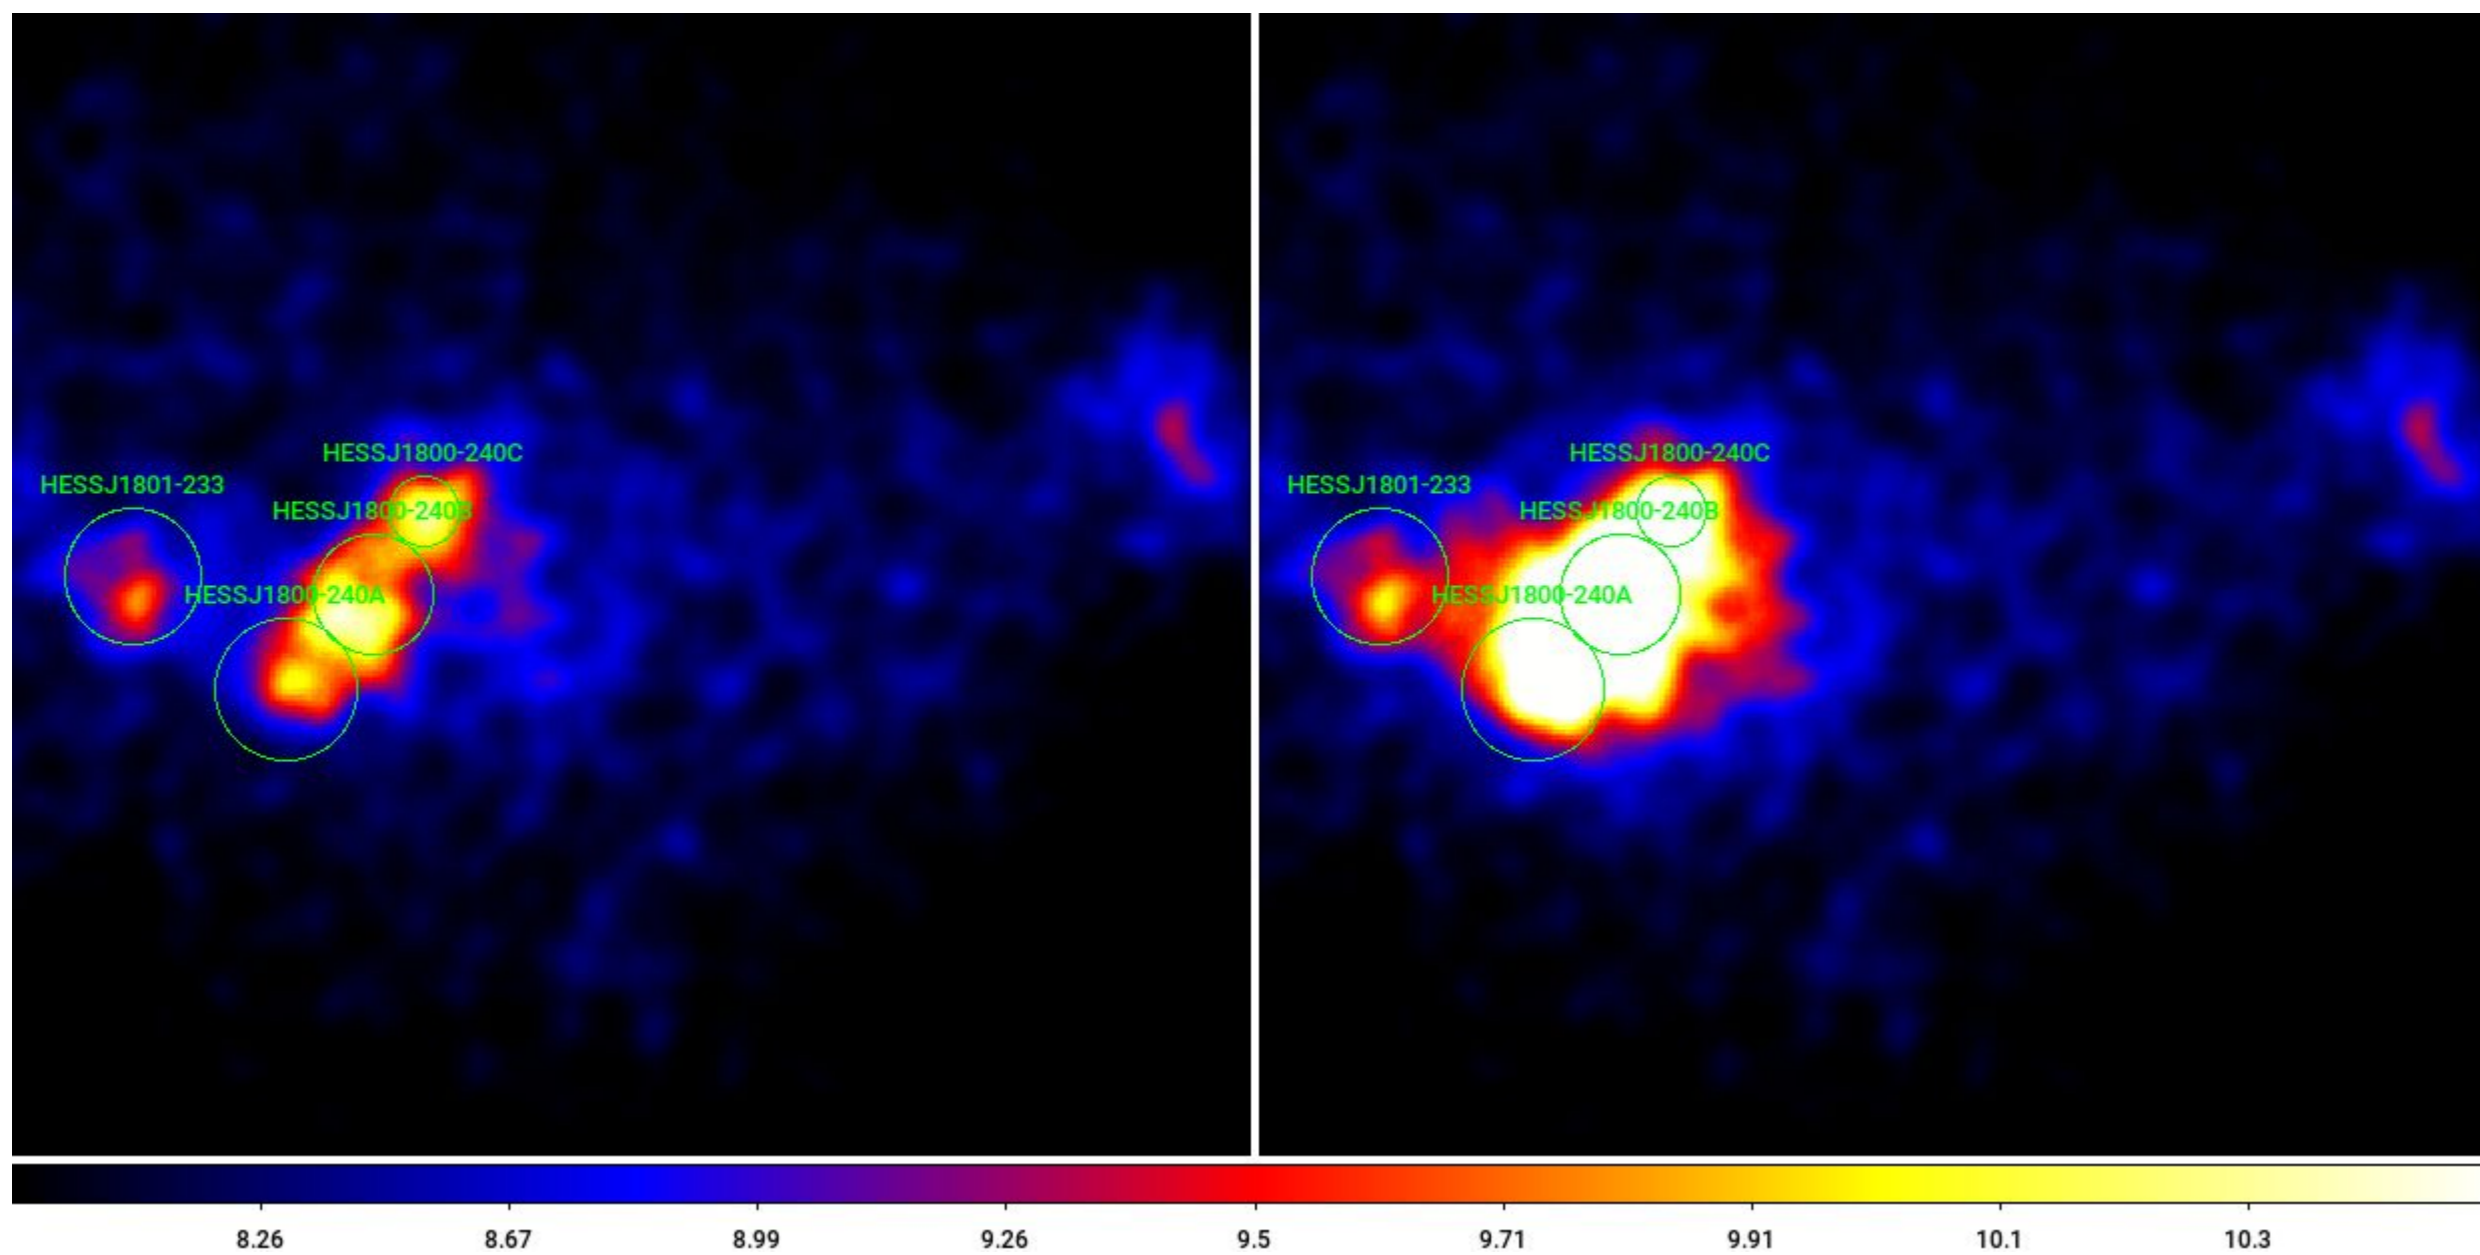

Binned vs Unbinned analysis;

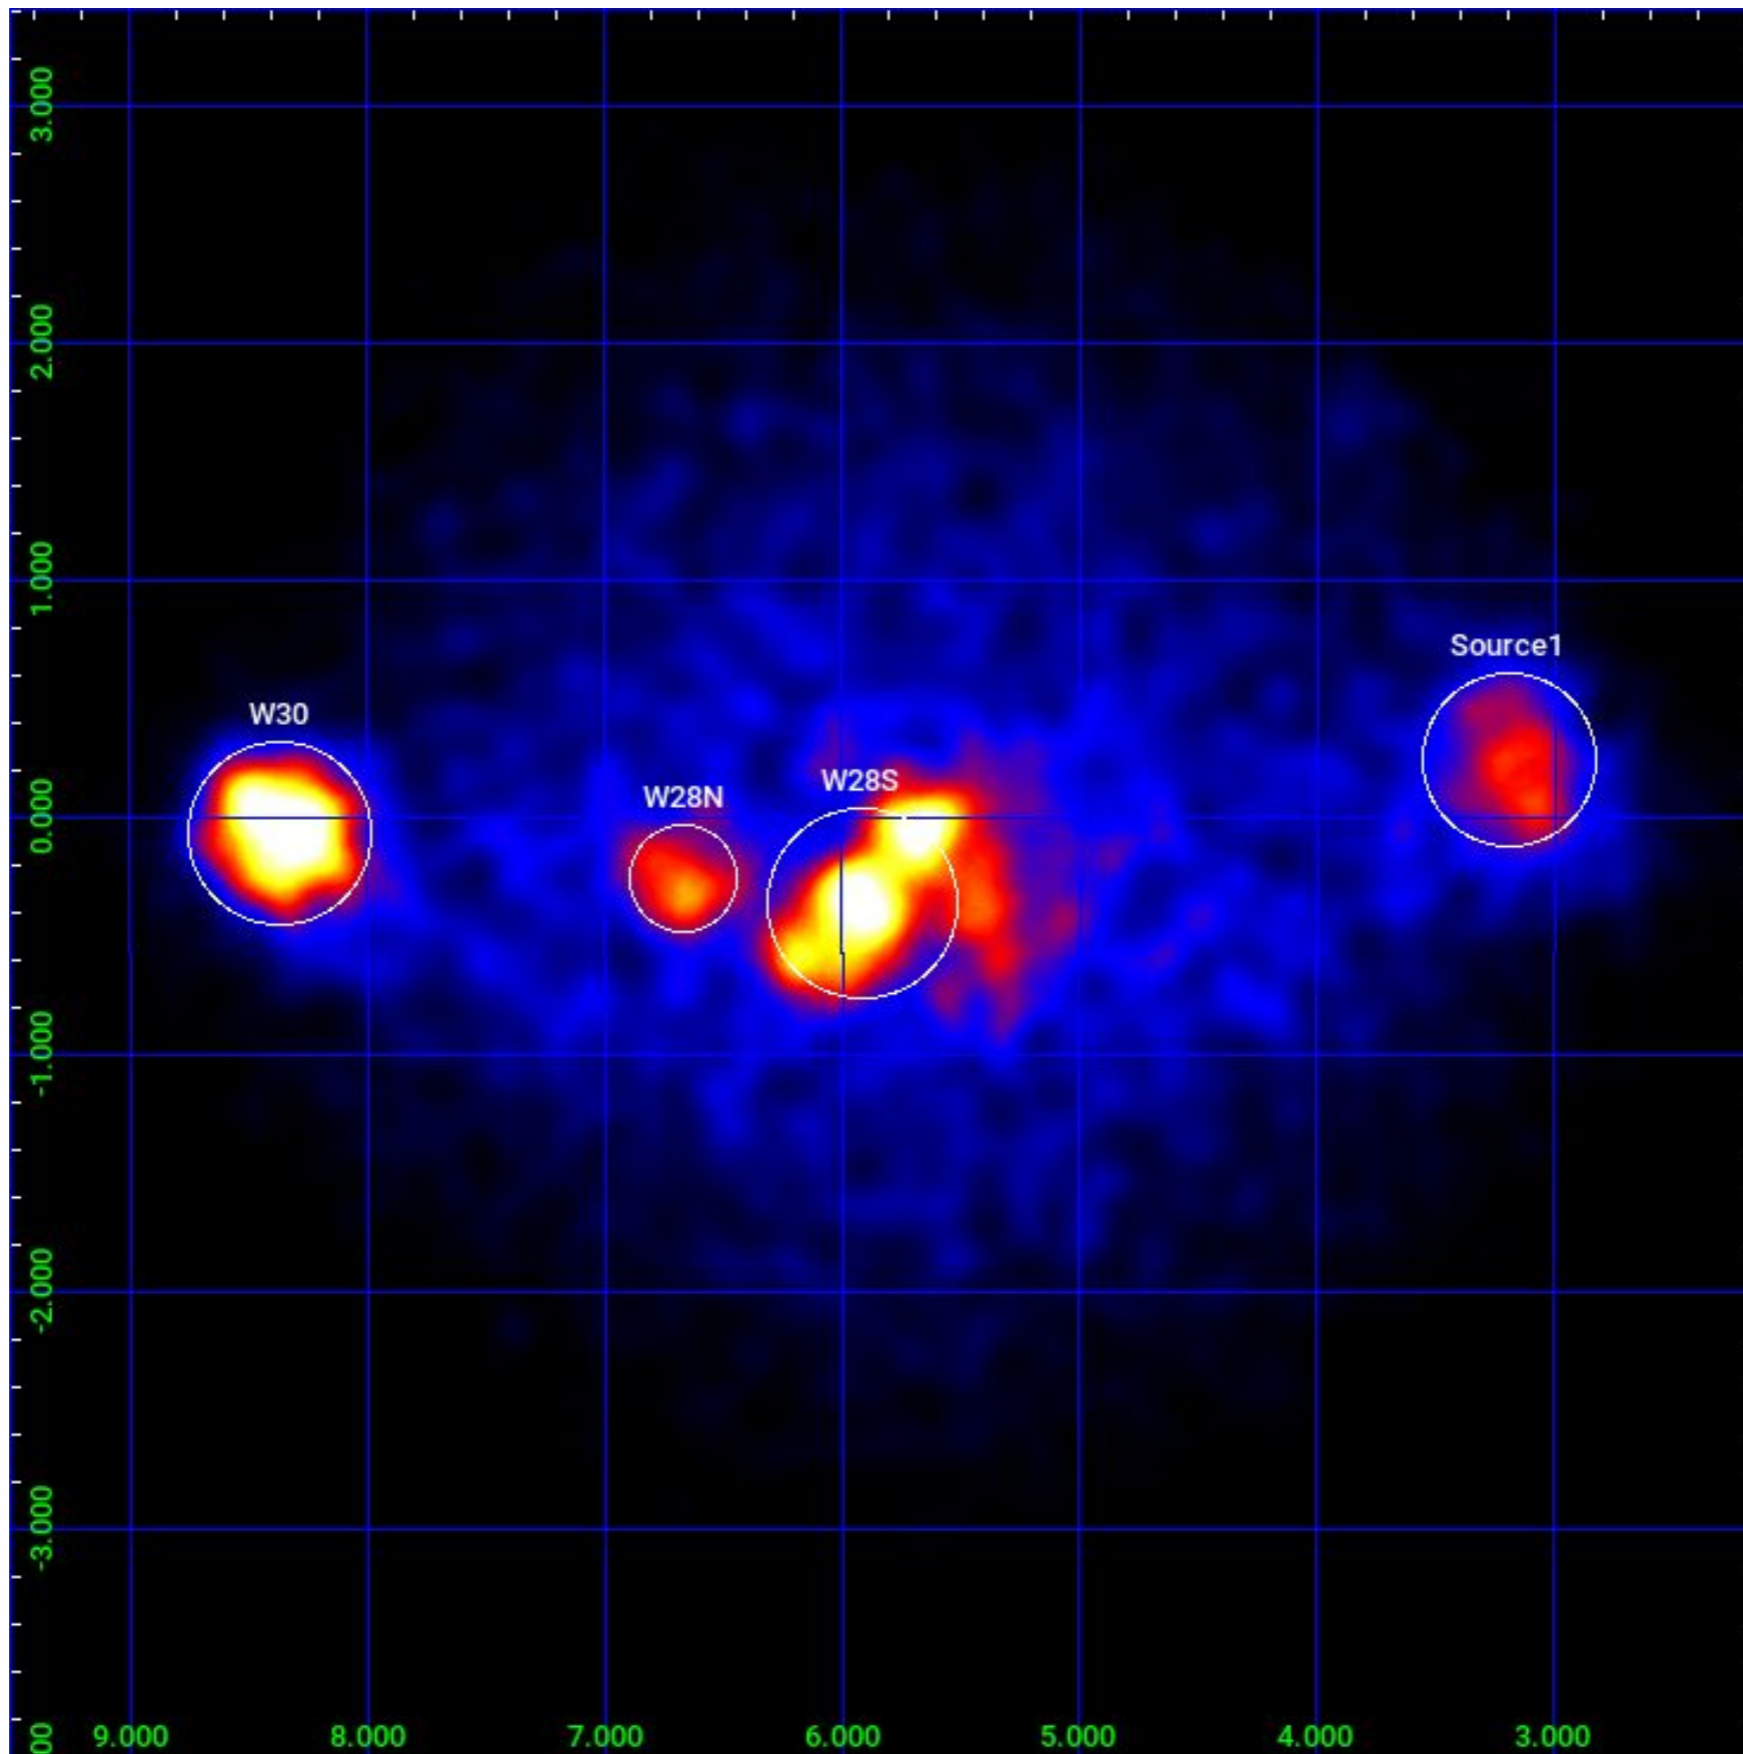

# ***Acdc - fixing some data bug***

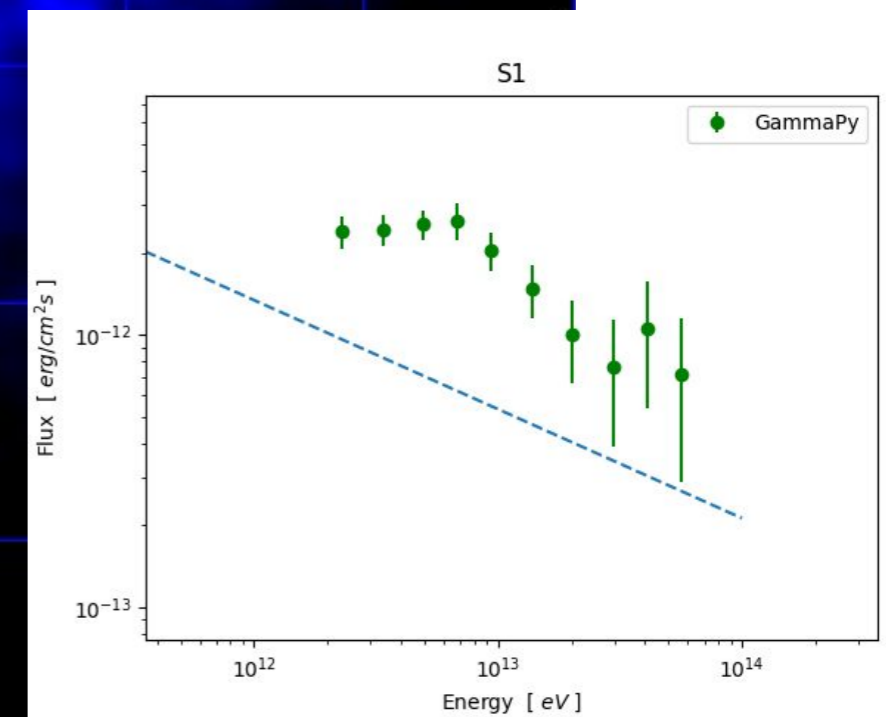

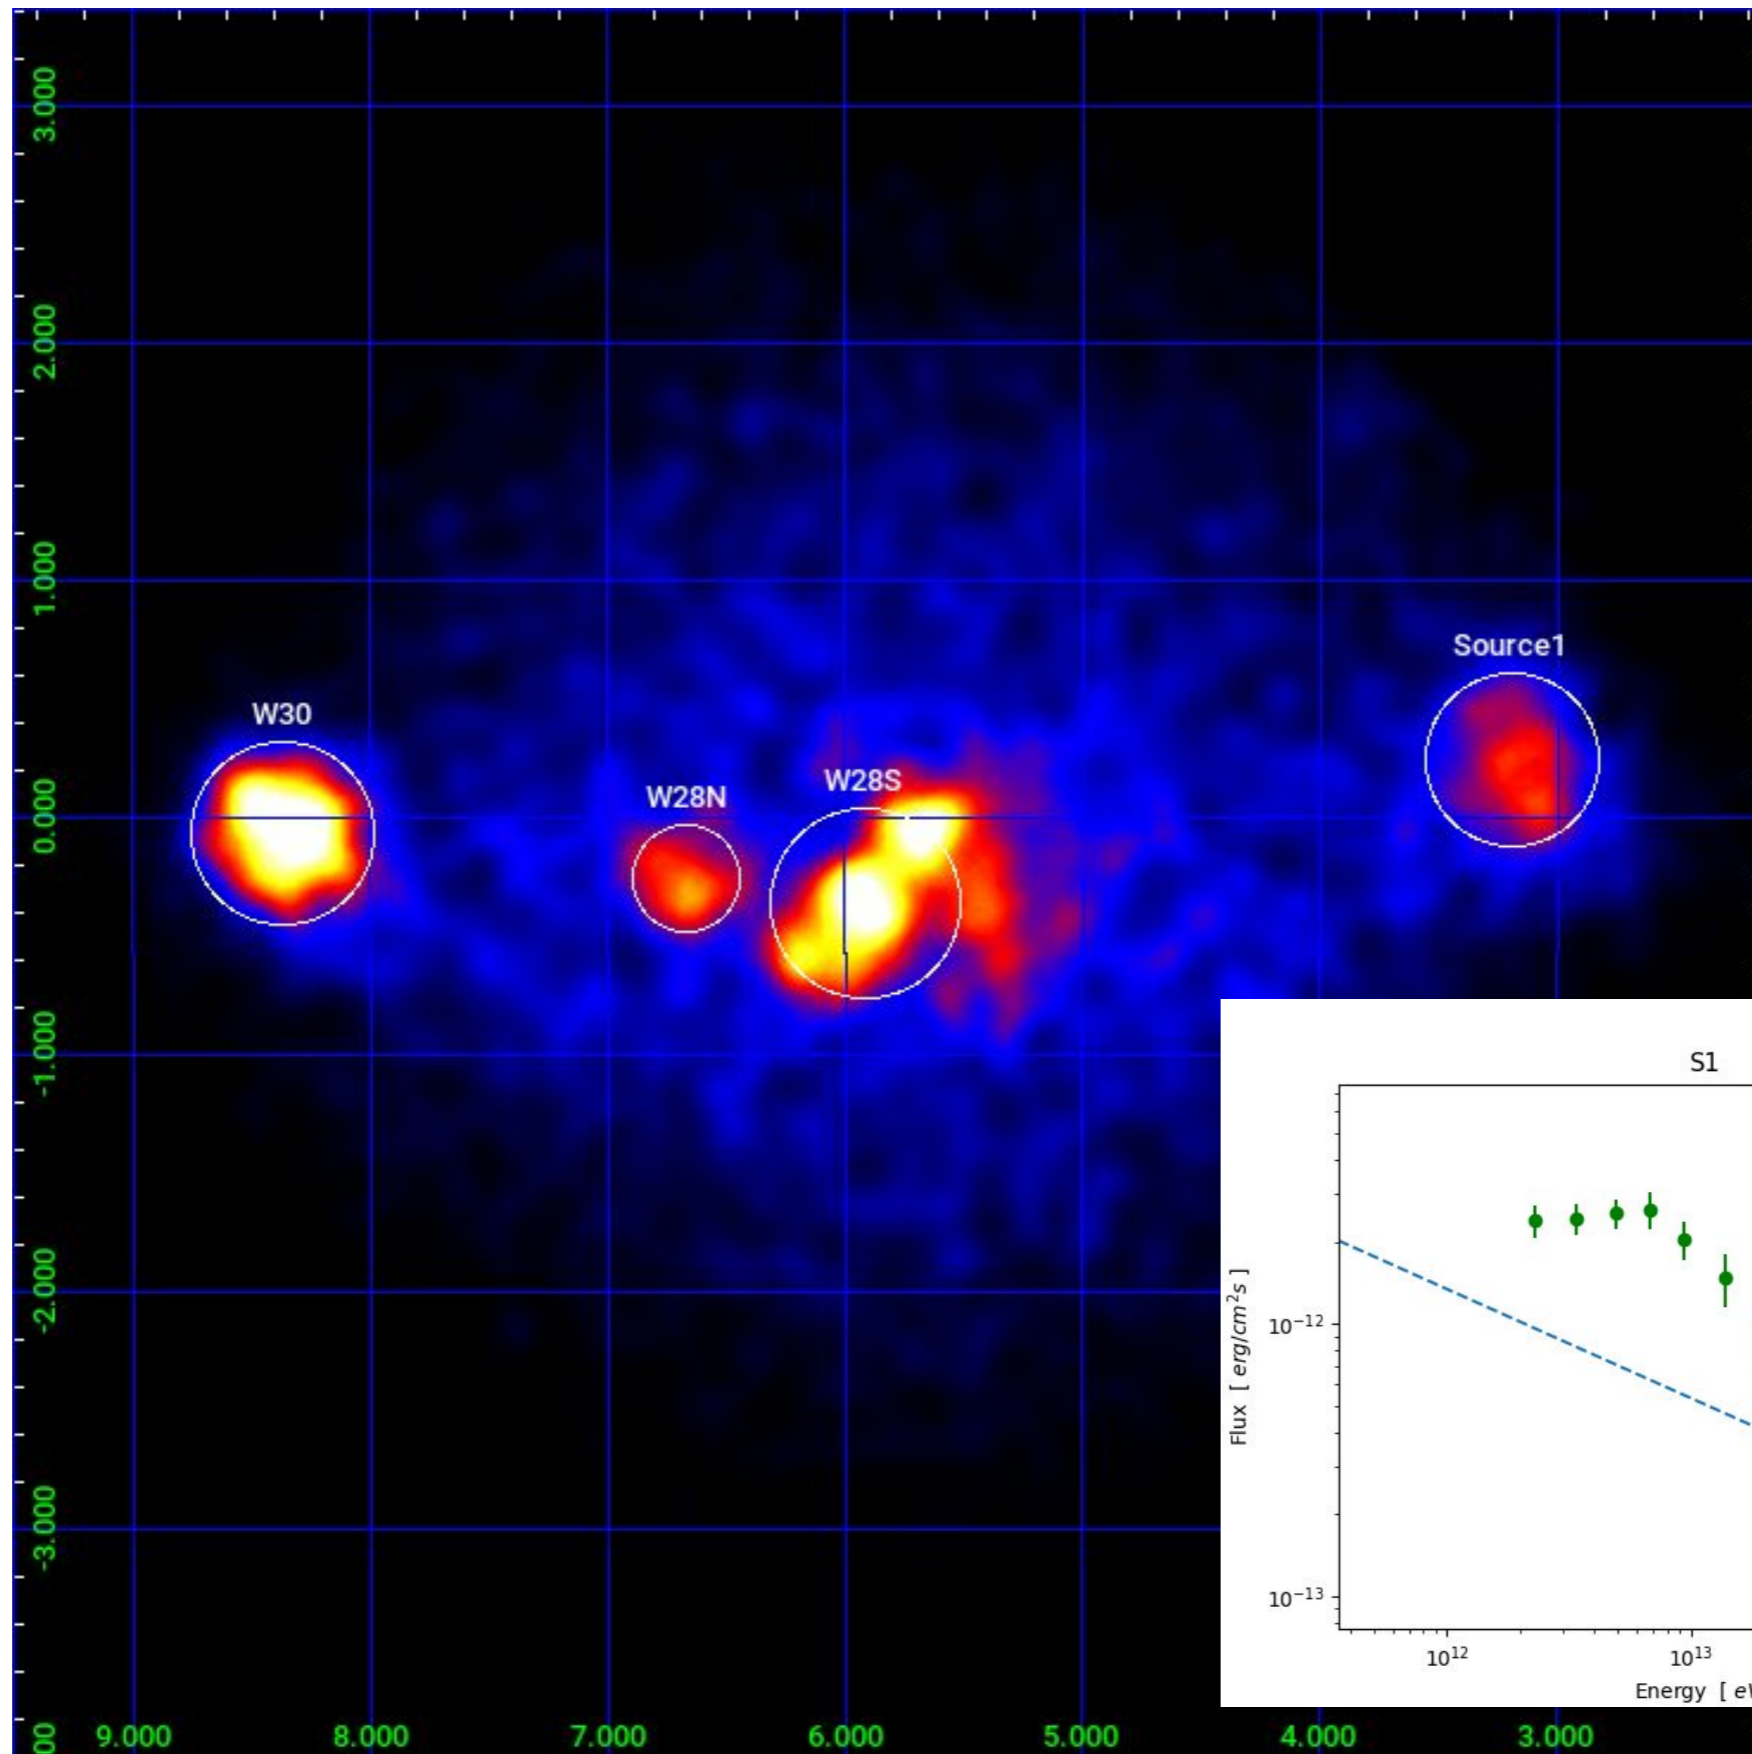

# *Acdc*

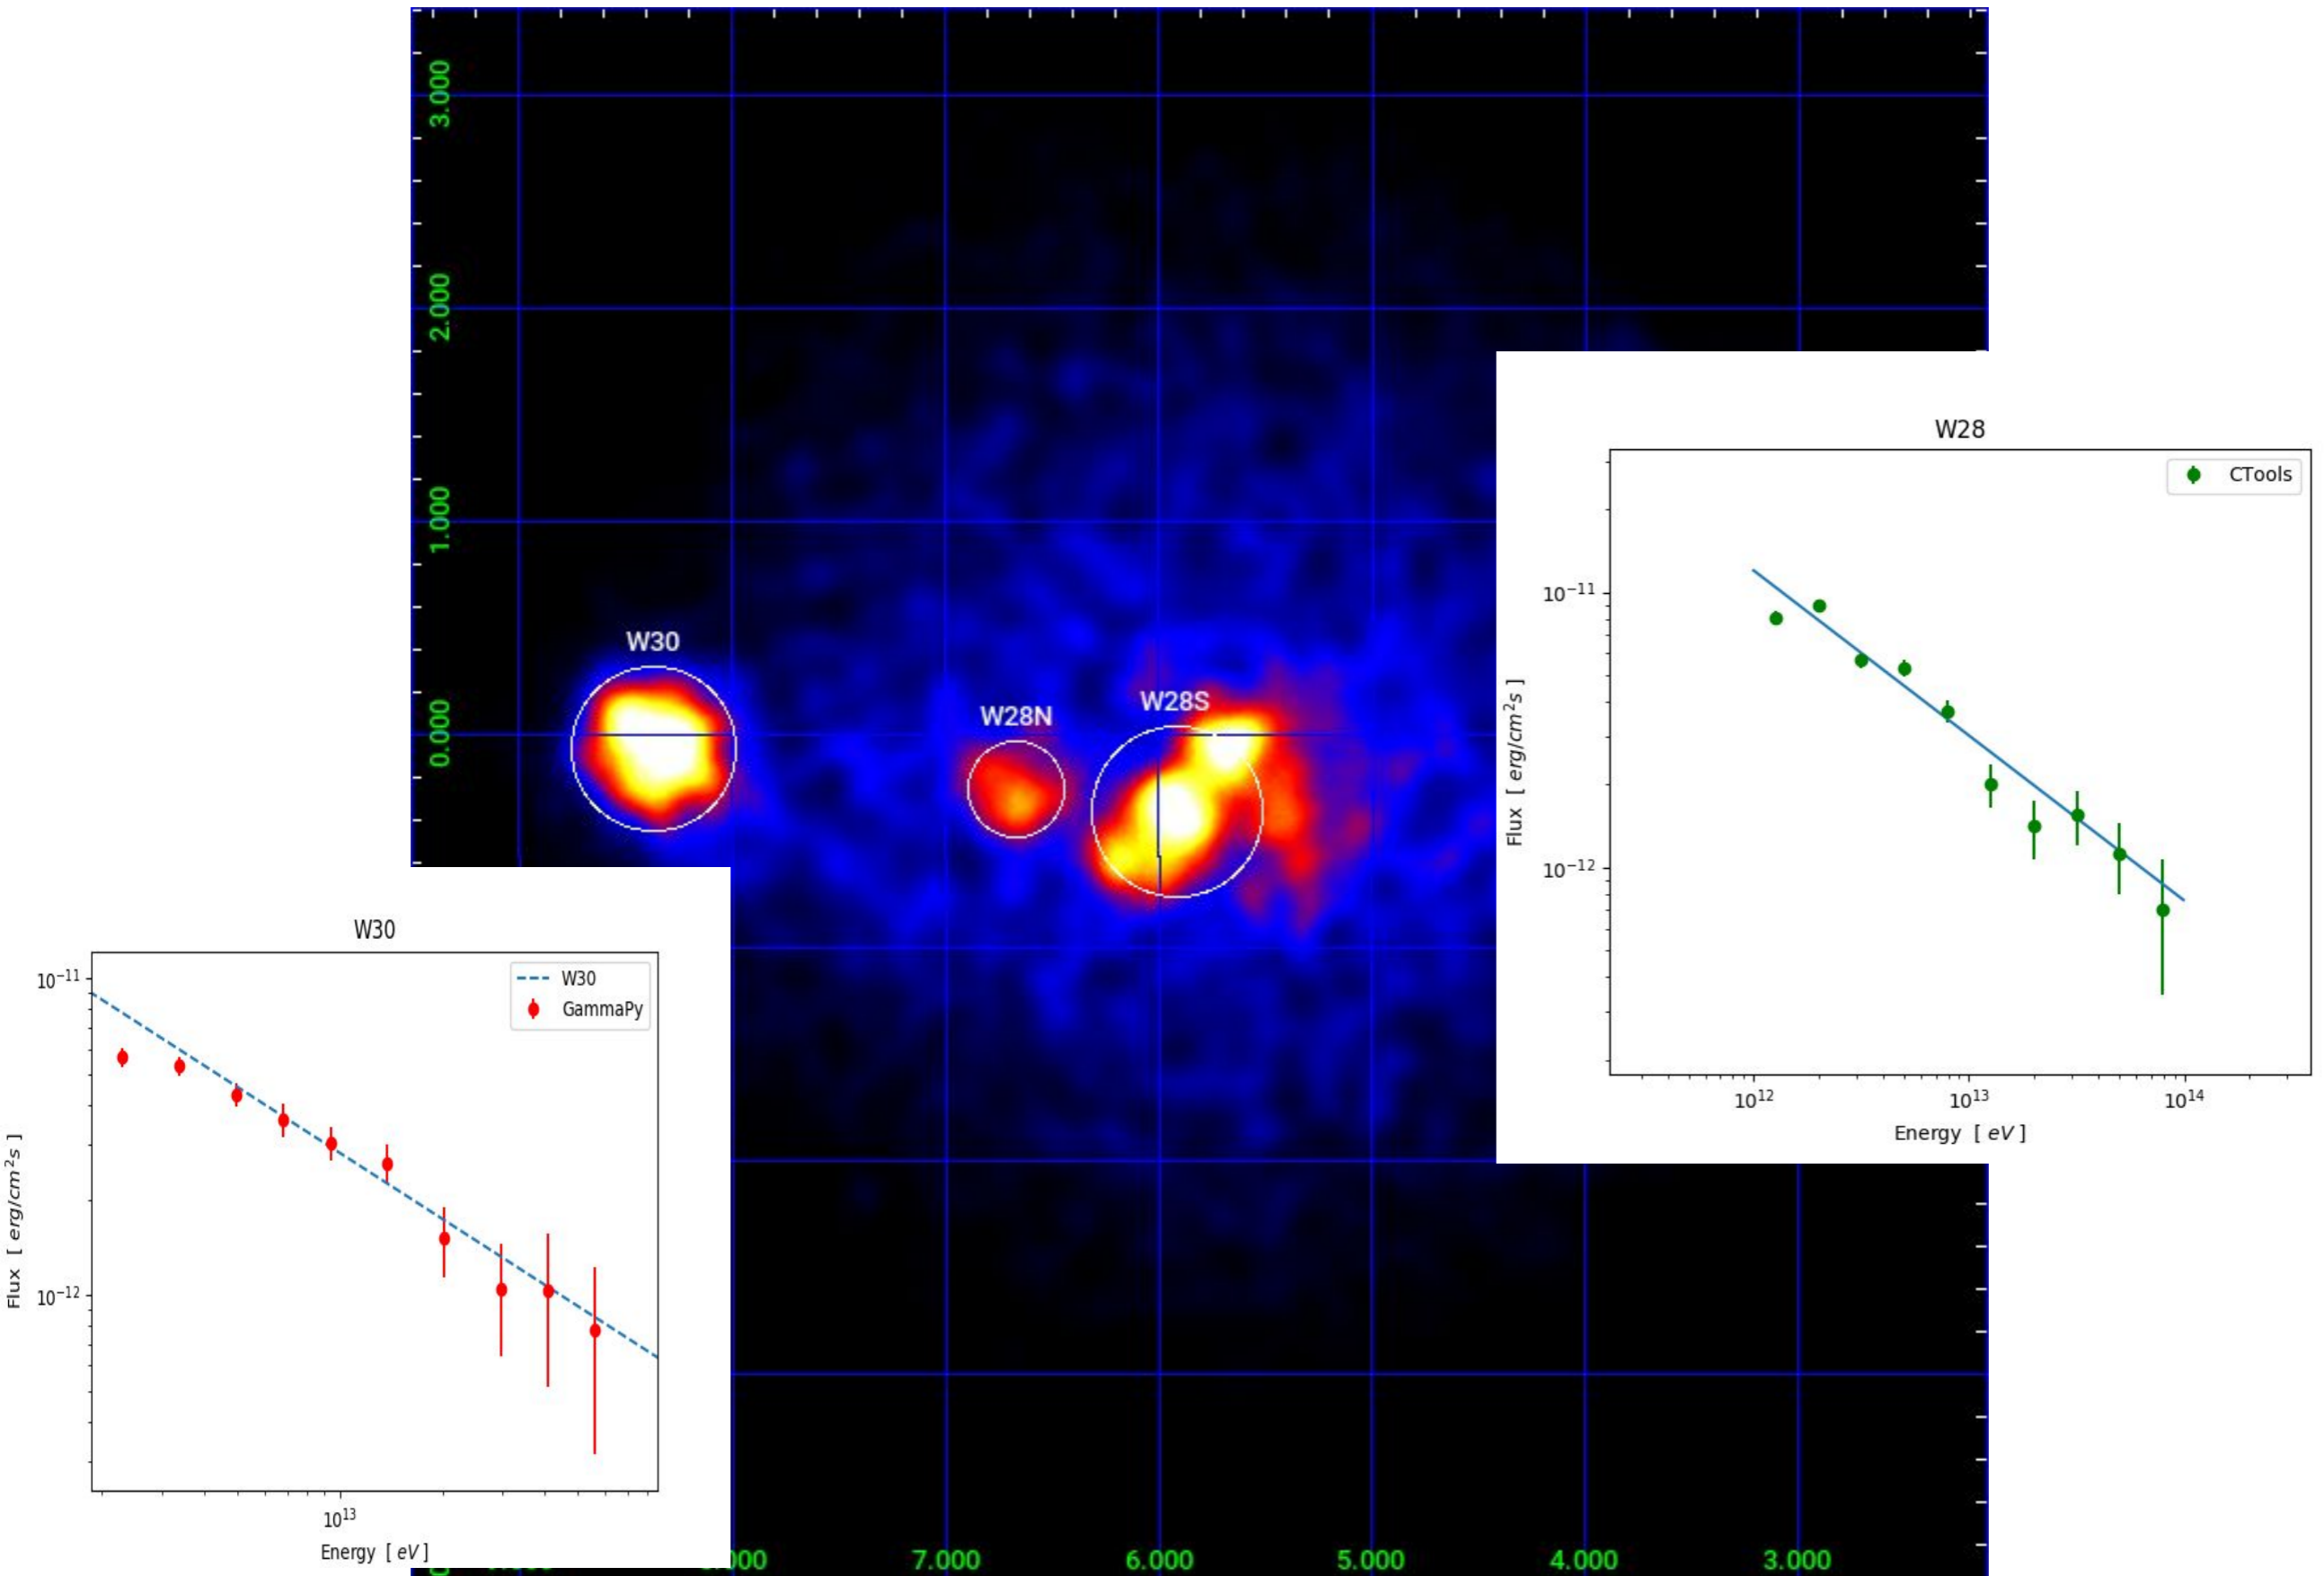

# ***Acdc - Field 12 (with GammaPy)***

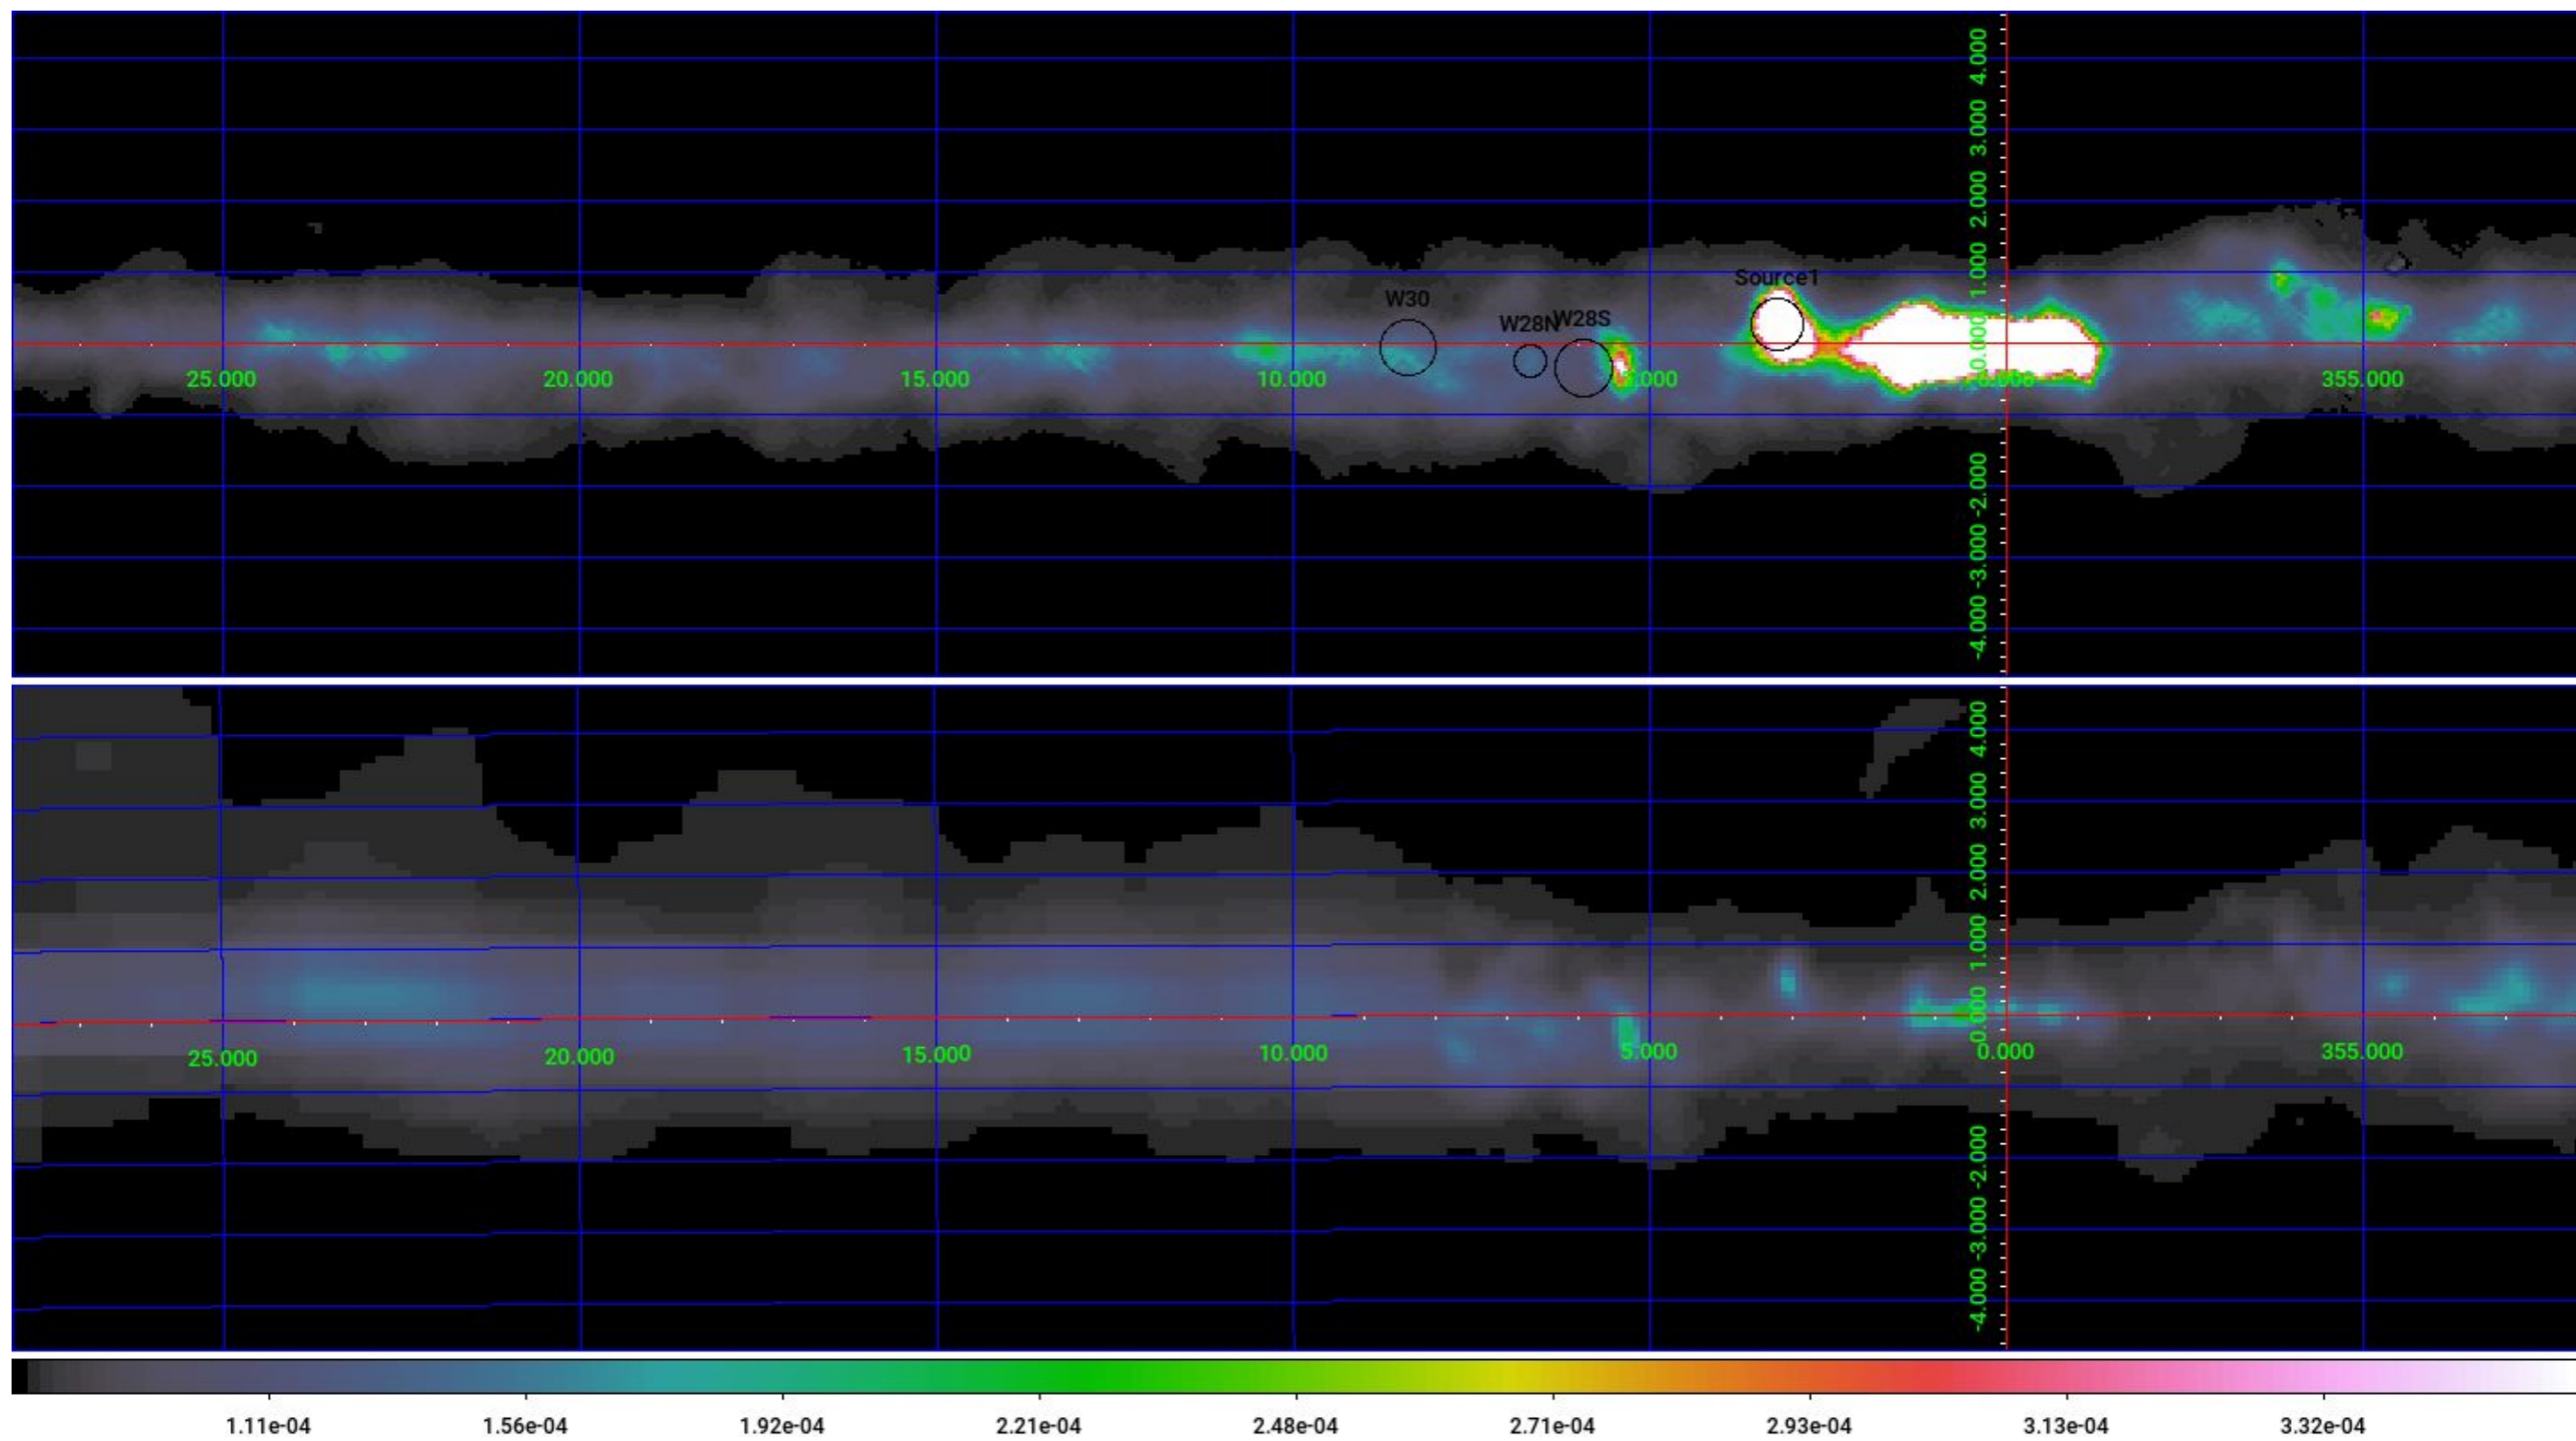

# ***Acdc - Field 12***

# *Acdc - Field 12*

# *Acdc*

# CTOOLS (v1.5.2): Binned analysis

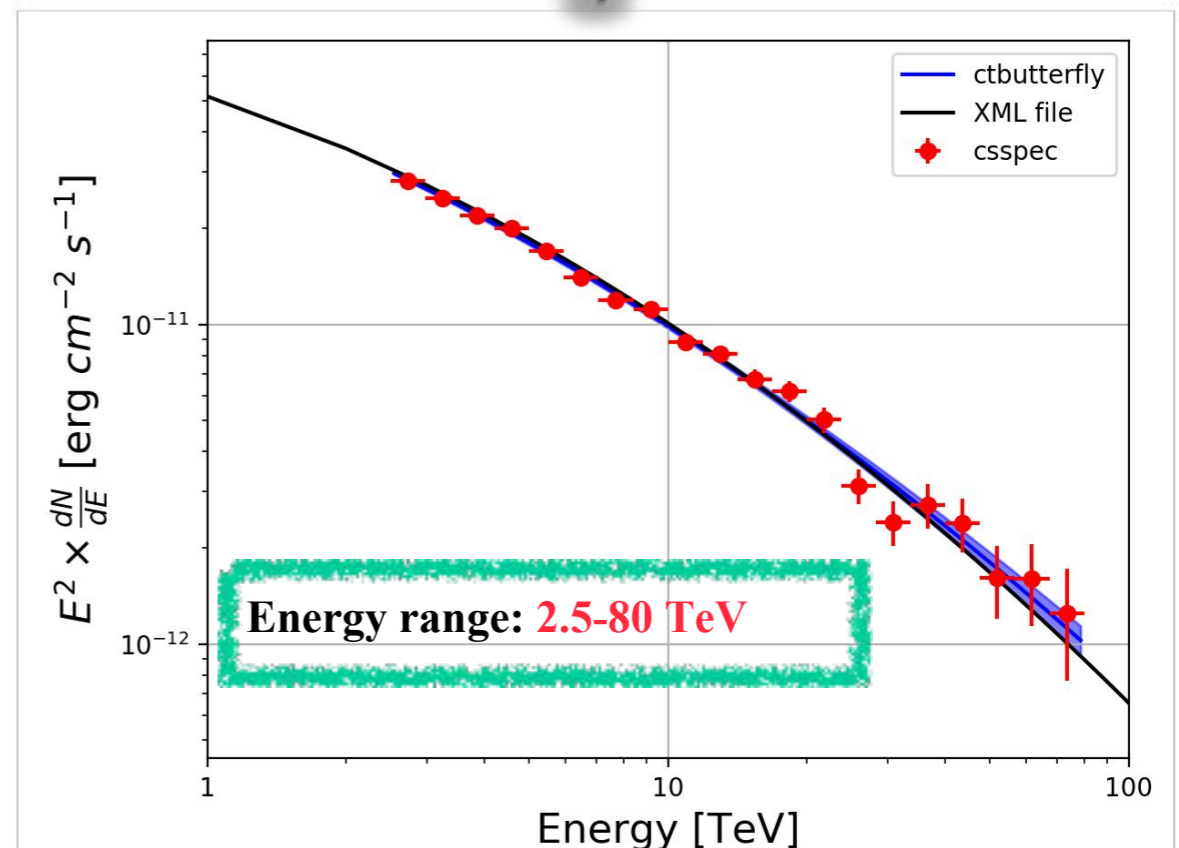

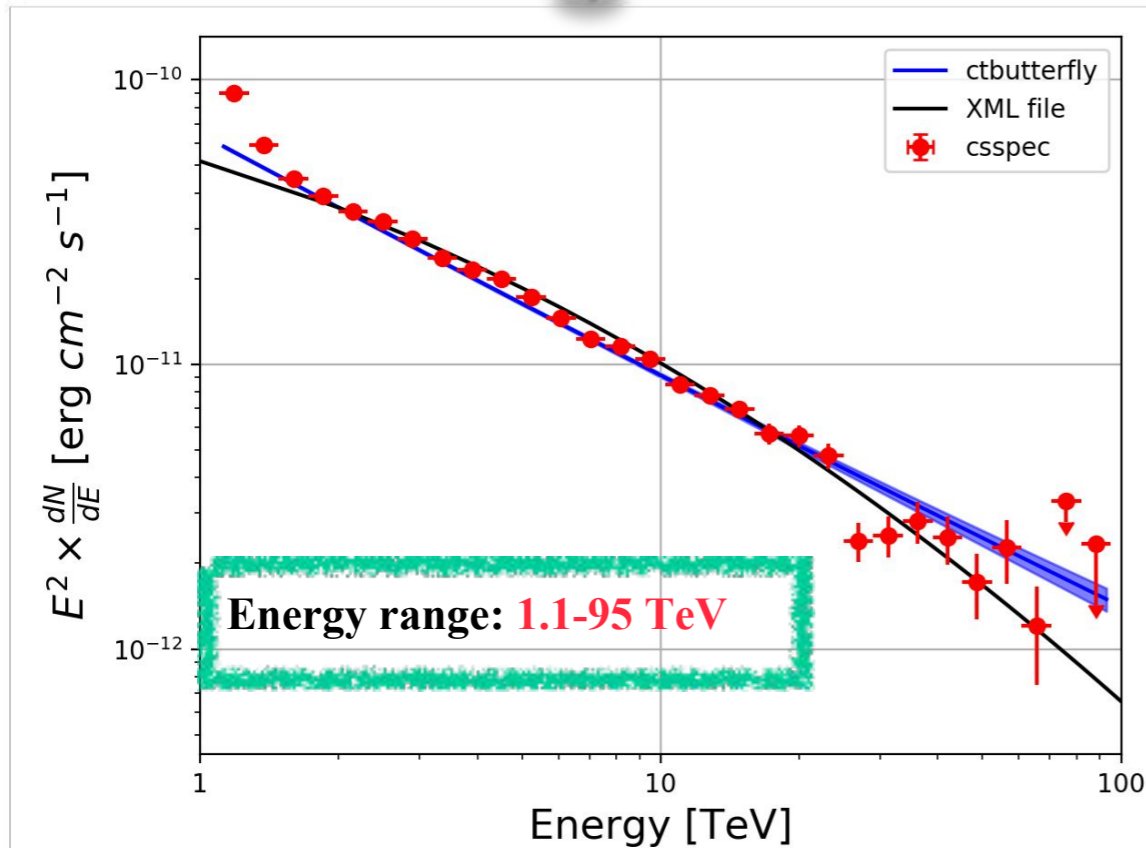

**CTBIN:**

20 energy bins,  
map size: 1.0 deg  
(0.05 deg x 20  
pix);

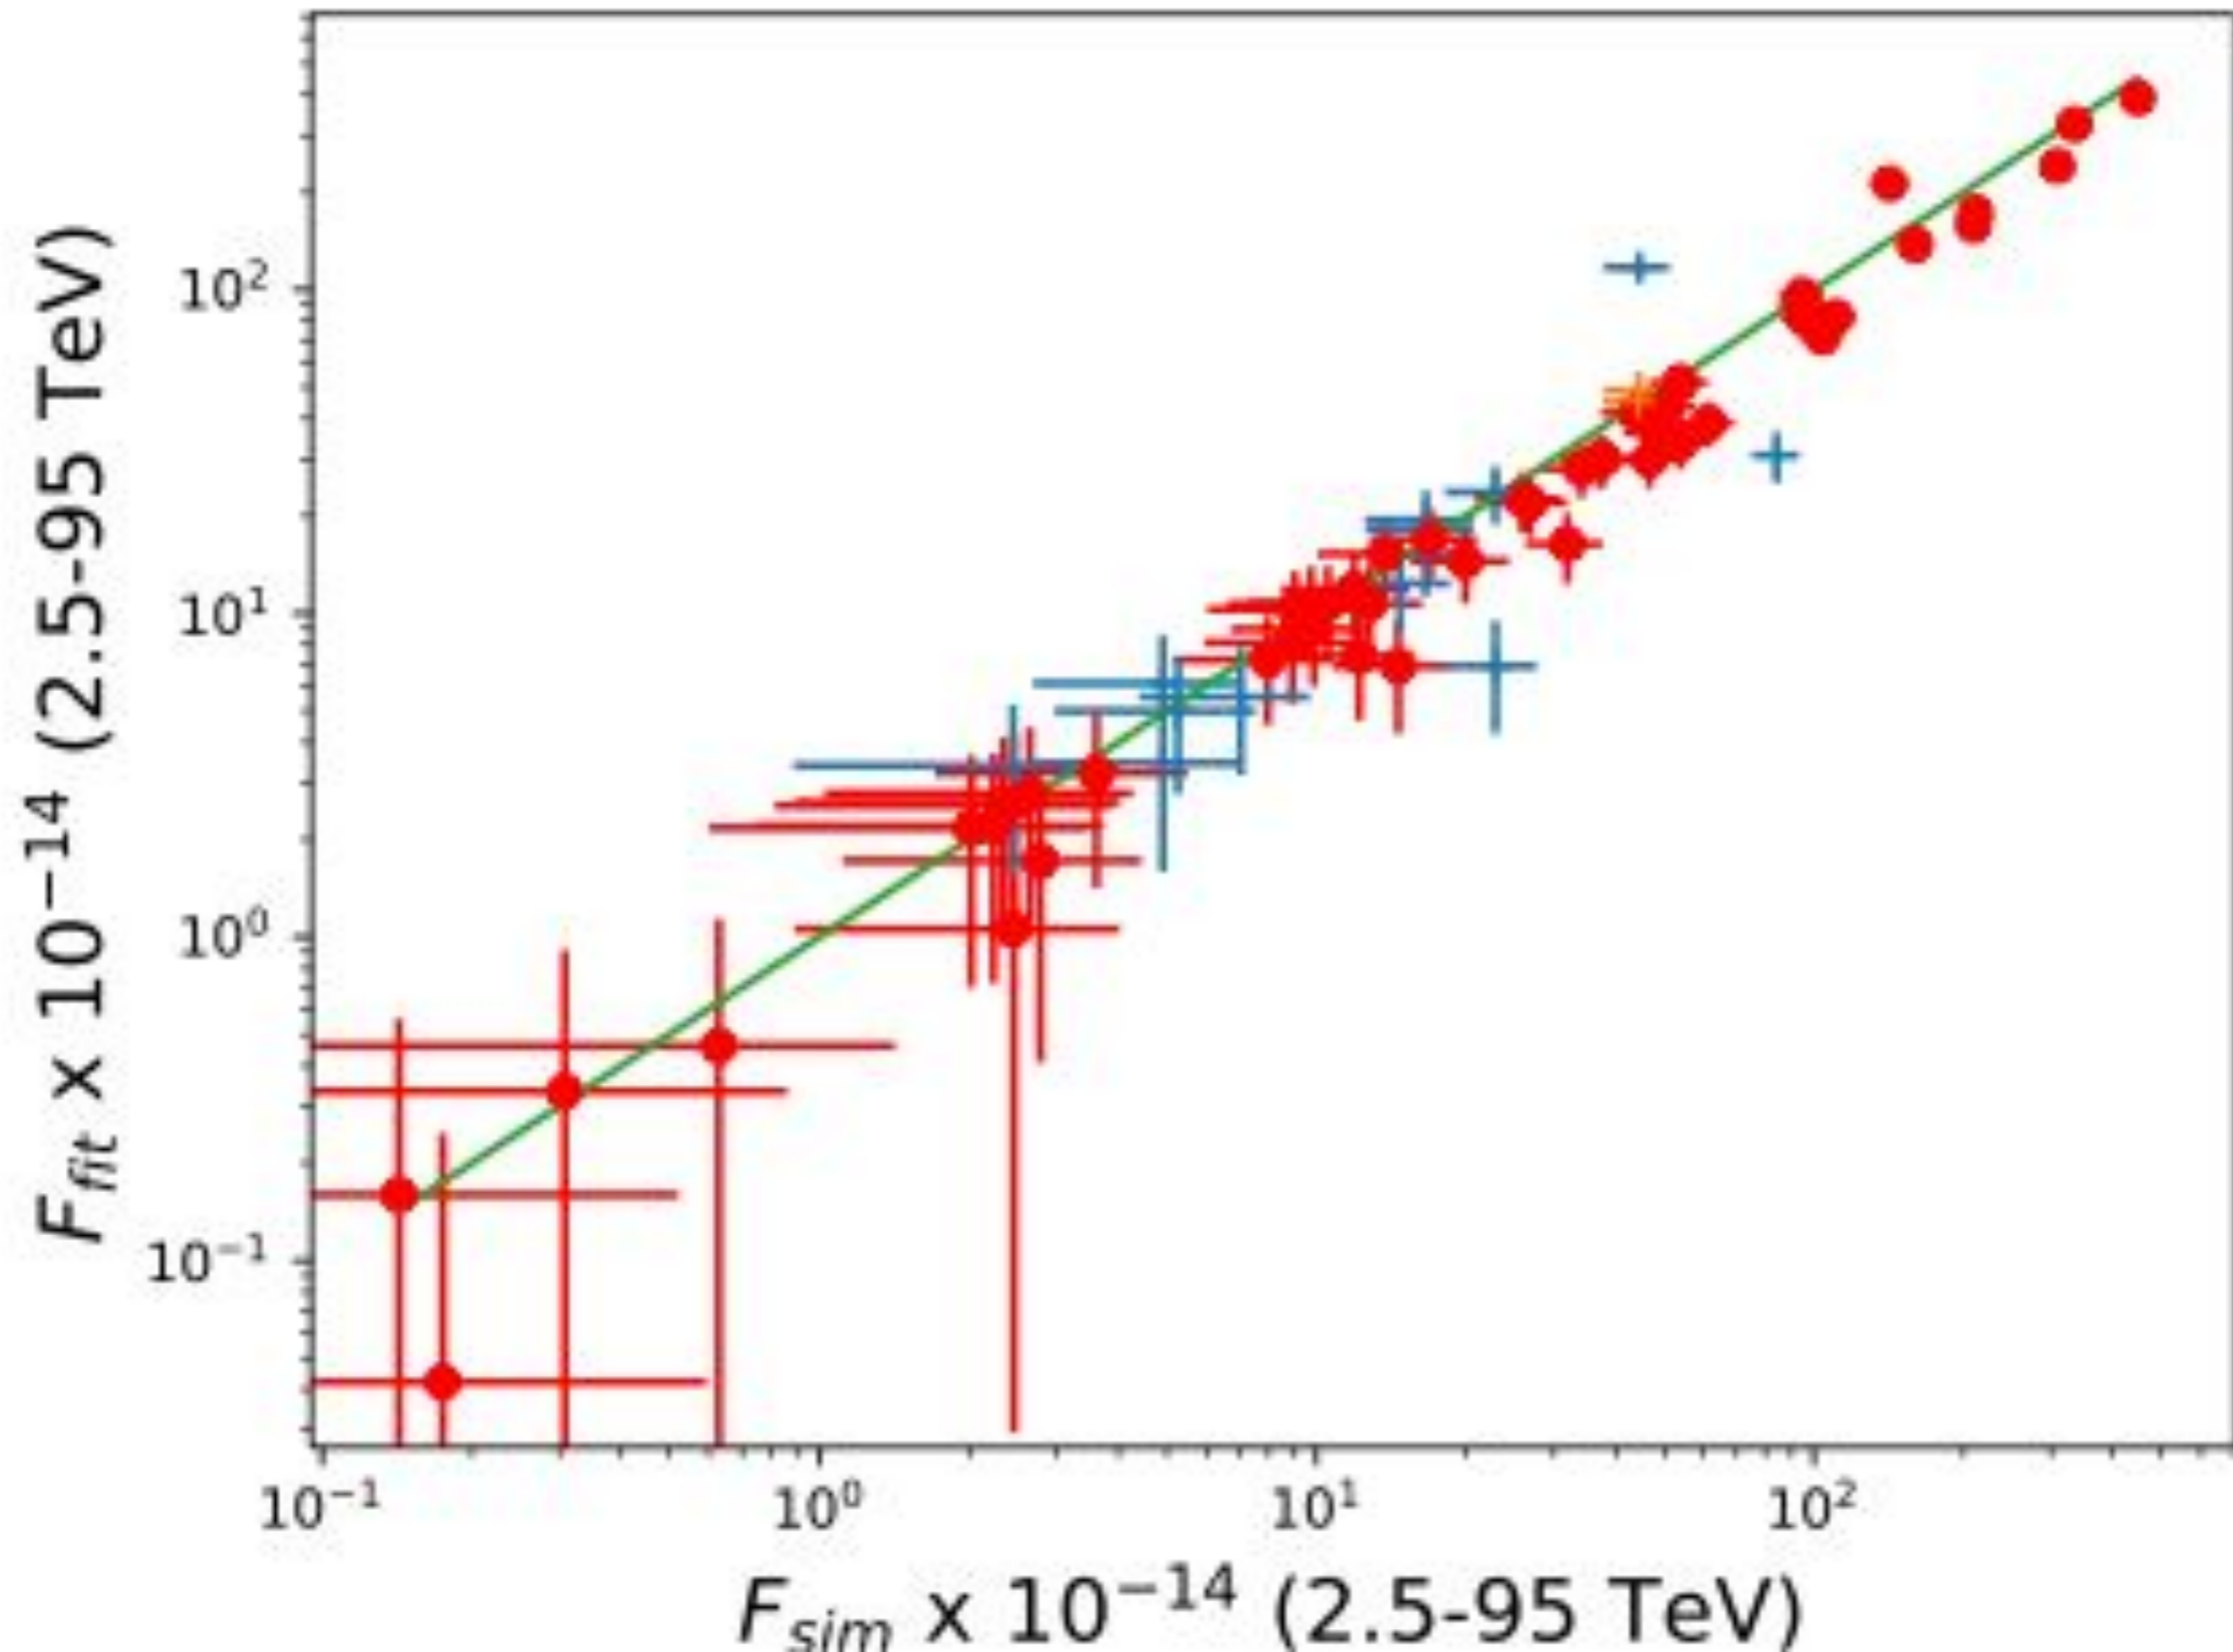

**CTPSFCUBE and  
CTEDISPCYBE:**  
20 energy bins;

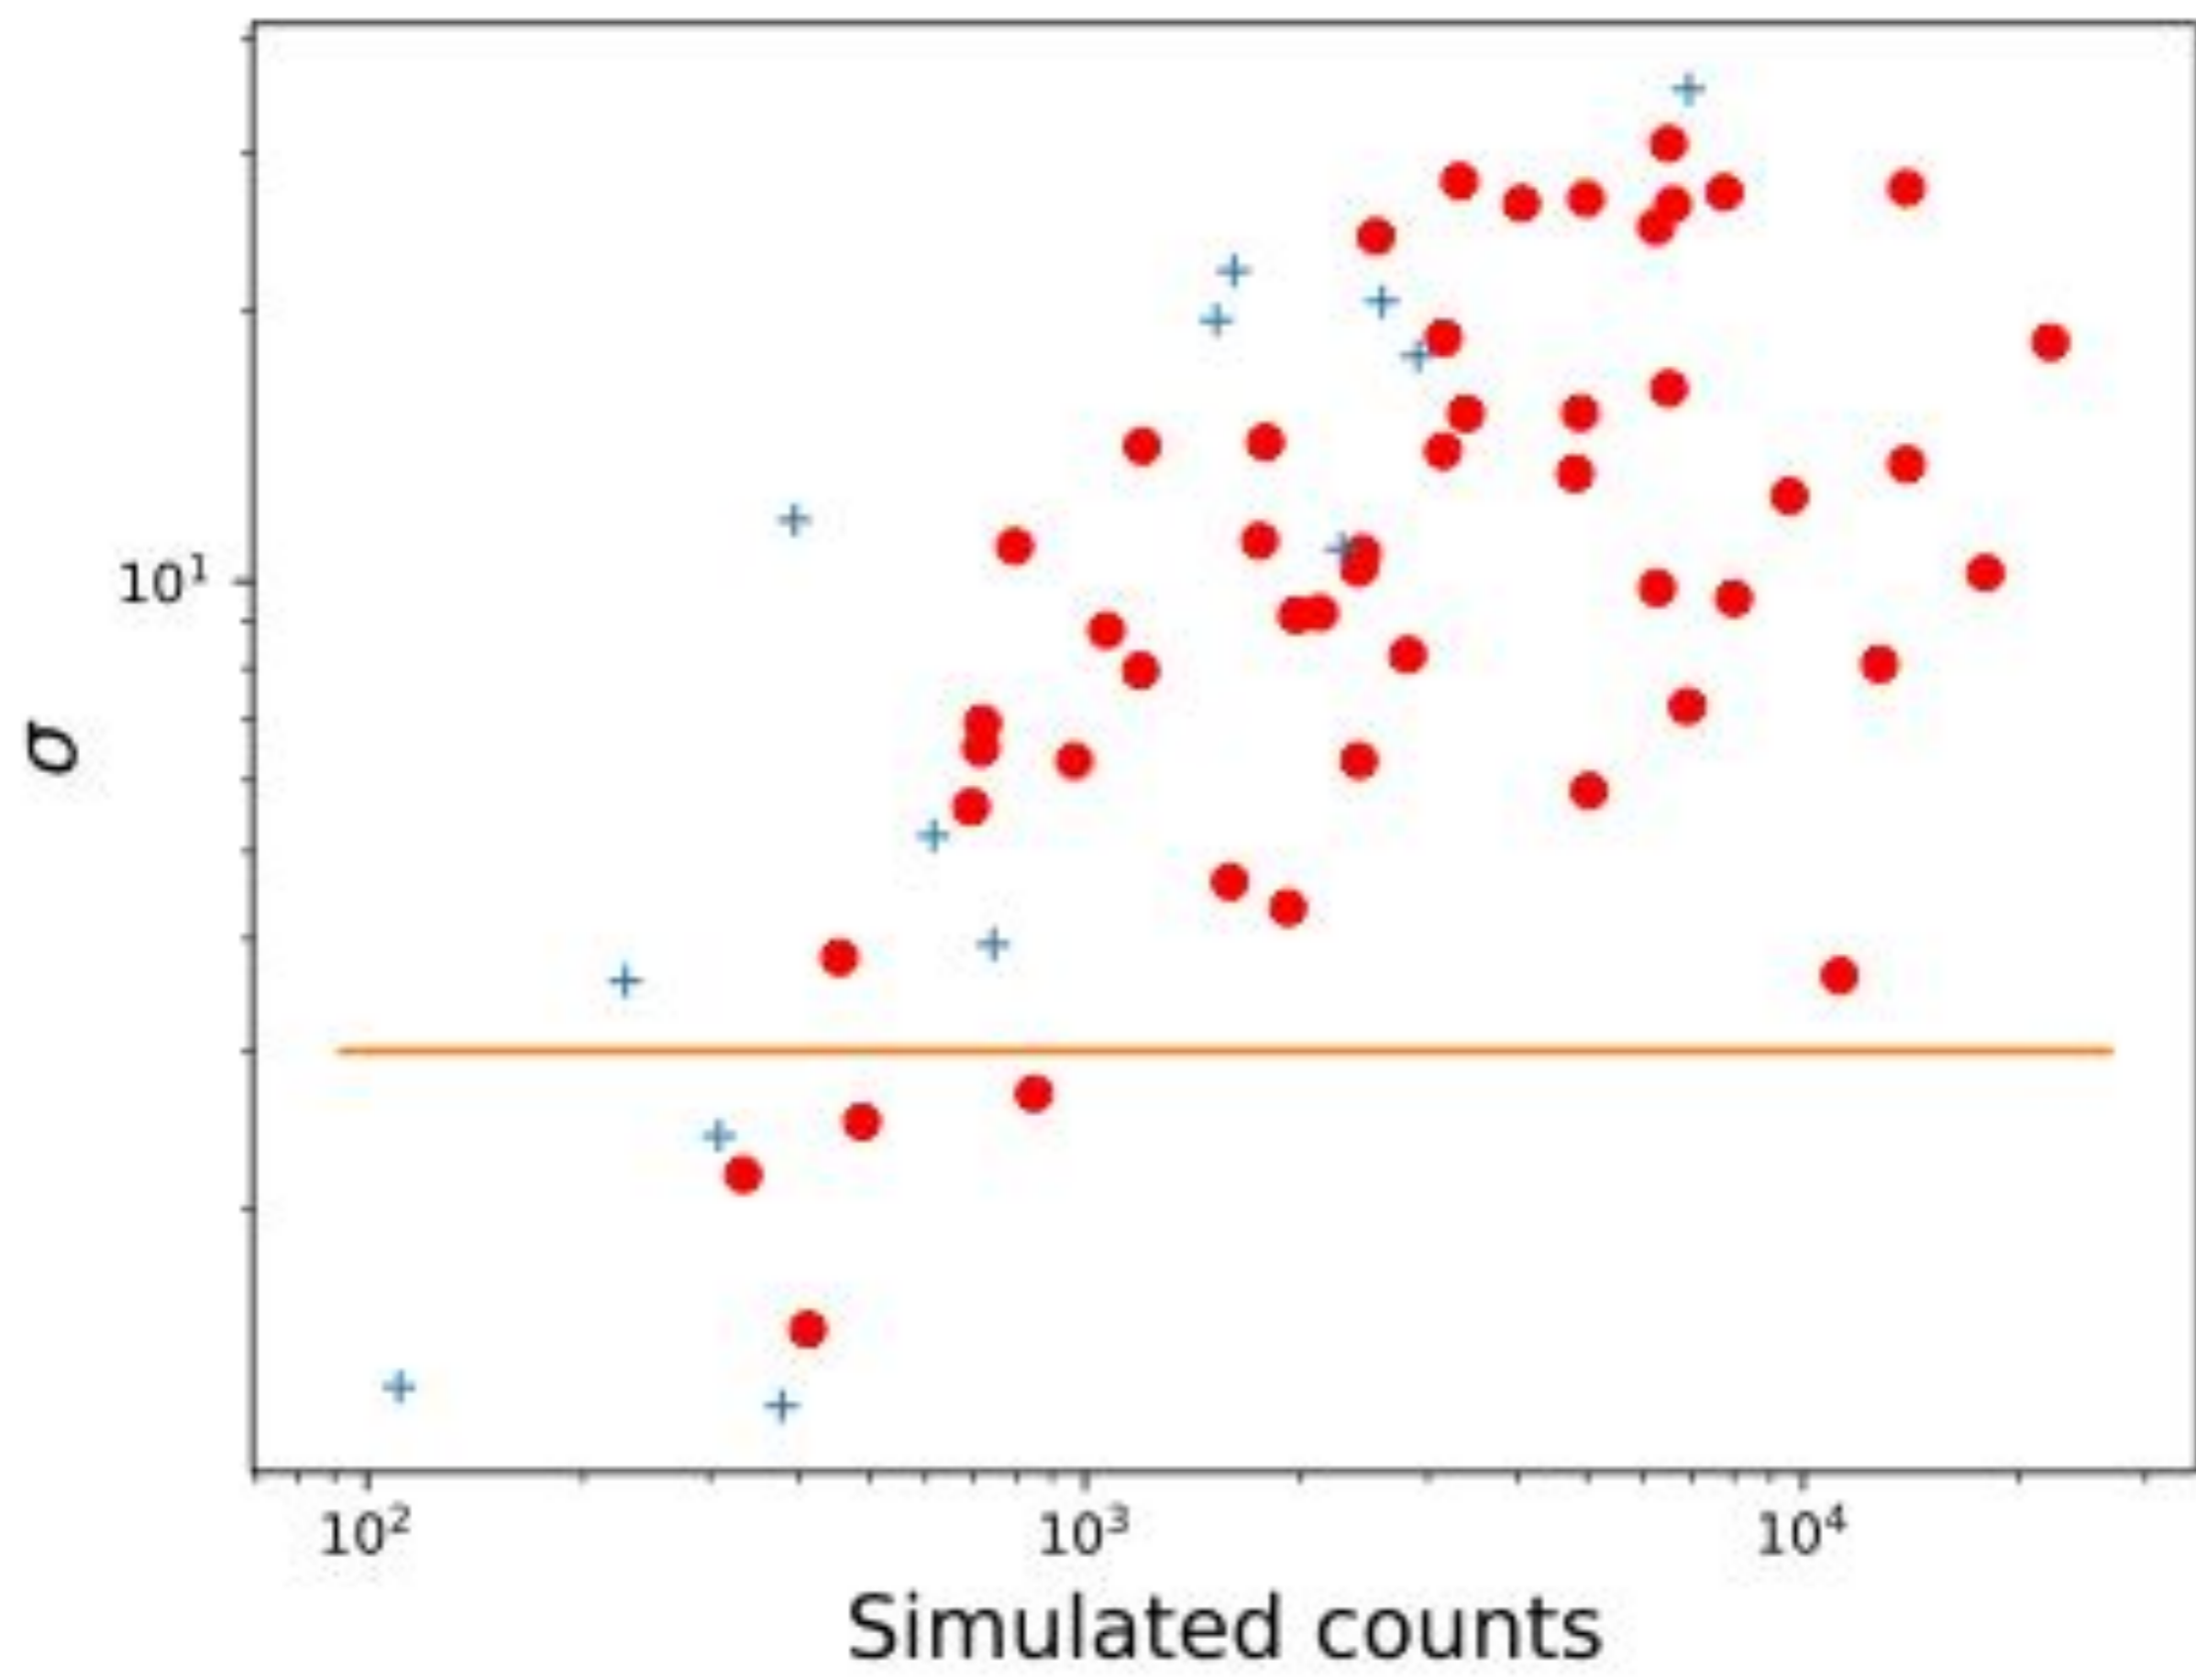

**CTLIKE:**  
edisp=yes

**CSSPEC edisp=yes:**  
slice;

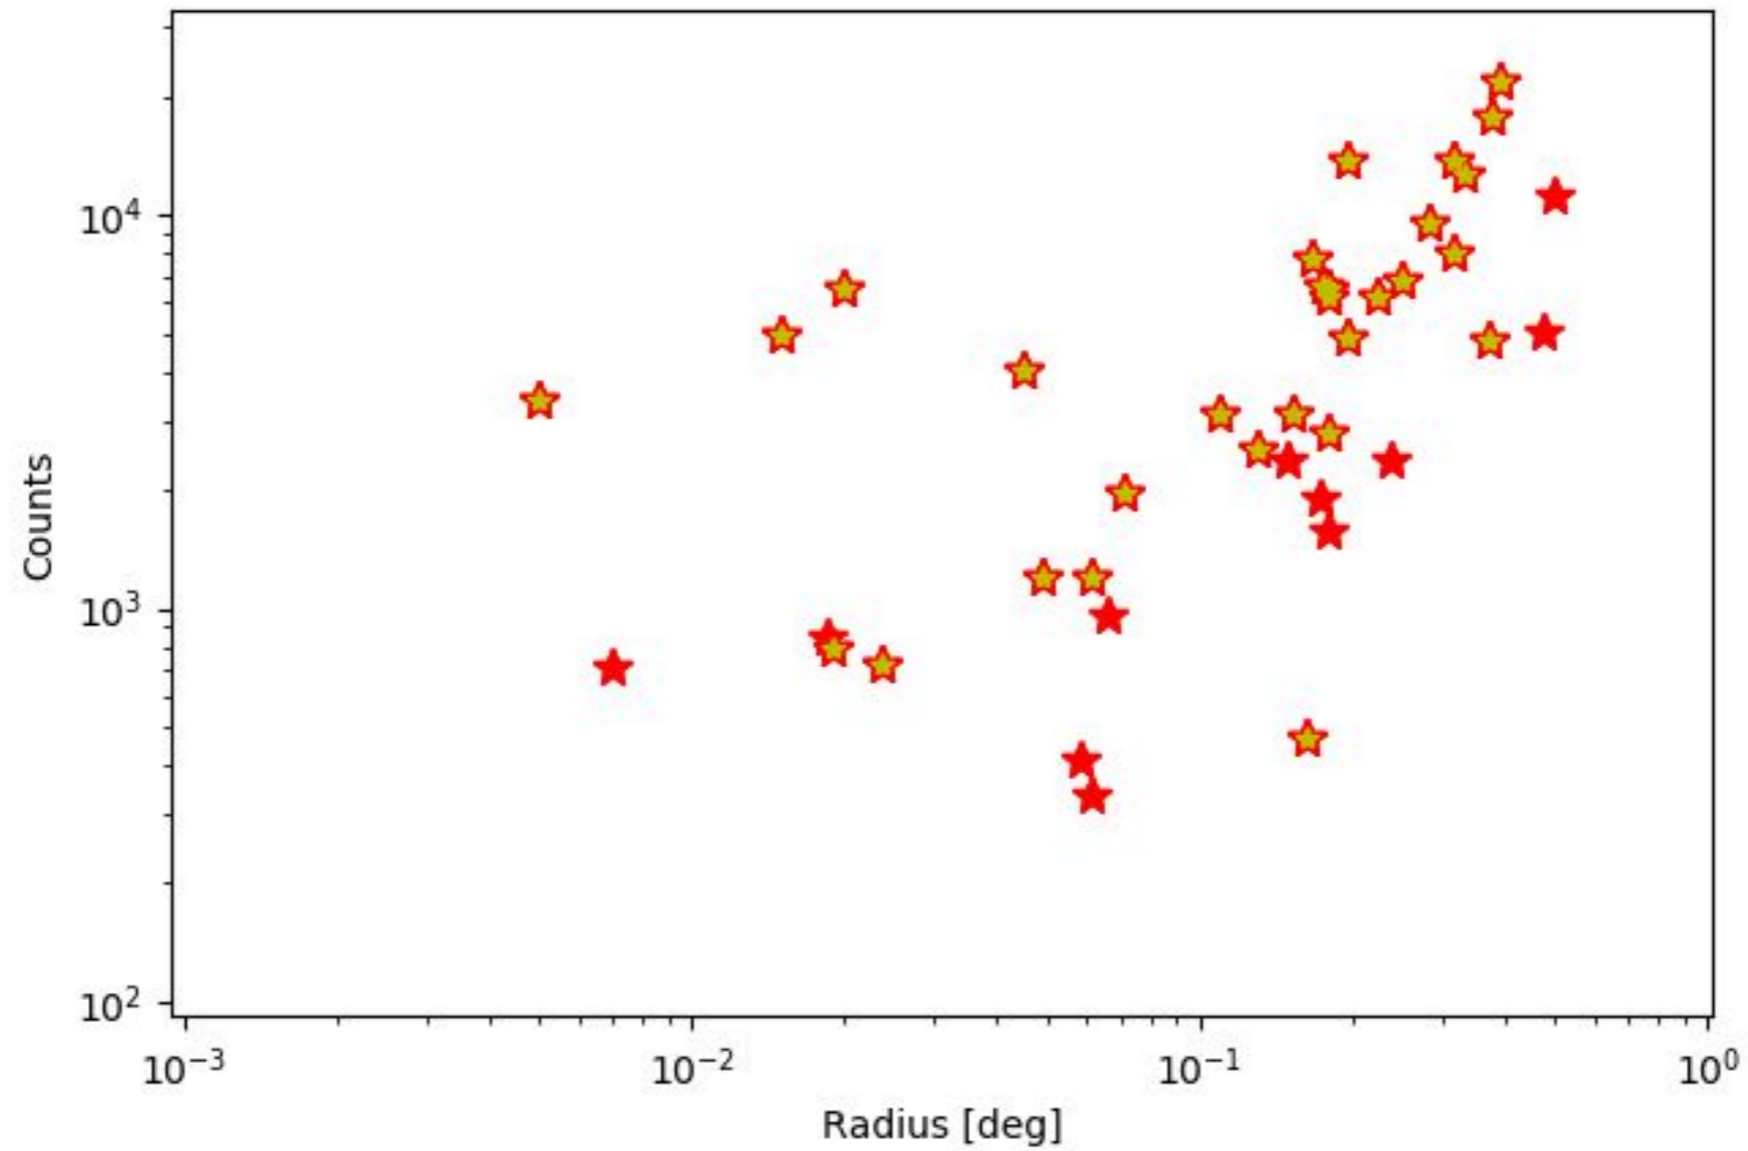

- $\sim 70$  sources (point-like, extended)
- most of them are detected
