

16th European Solar Physics Meeting

Monday, 6 September 2021

Poster Session 1.6 (10:45 - 12:16)

-Conveners: Manolis Georgoulis

time	[id] title	presenter
10:45	[380] Statistical study of CMEs, lateral overexpansion and SEP events	ADAMIS, Alexandros
10:58	[263] Estimating uncertainties in the back-mapping of the fast solar wind	KOUKRAS, Alexandros
11:11	[396] Novel validation scheme for quality assessment of coronal models	WAGNER, Andreas
11:24	[404] 3D CME reconstruction model comparison: GCS vs. StereoCAT	Mr NIEMELA, Antonio
11:37	[512] Geo-effectiveness prediction of CMEs with EUHFORIA coupled to OpenGGCM	Ms MAHARANA, Anwasha
11:50	[555] Including ephemeral regions in surface flux transport simulations and solar irradiance reconstructions	HOFER, Bernhard
12:03	[266] The Role of Magnetic Reconnection in the Acceleration and Expansion of A Coronal Mass Ejection on 2013 February 27	ZHUANG, Bin
