

16th European Solar Physics Meeting

Monday, 6 September 2021

Poster Session 2.2 (15:30 - 17:01)

-Conveners: Ramon Oliver

time	[id] title	presenter
15:30	[398] Effect on heliospheric magnetic field and wind due to supergranular driving of streamers and pseudostreamers	Prof. PONTIN, David
15:43	[388] Preparing for DKIST: Using SUNRISE/IMaX Data to Compute Energy Fluxes from the Quiet Sun	TILIPMAN, Dennis
15:56	[397] Understanding the characteristics of solar WINQSEs	Prof. OBEROI, Divya
16:09	[288] Inference of log(gf) values for atomic lines in NUV spectral range	VUKADINOVIC, Dusan
16:22	[323] Acoustic/shock wave propagation in the gravitationally stratified partially ionised plasmas: the multi-dimensional effects	Dr ZHANG, Fan
16:35	[506] Will it rain today? The role of asymmetries in coronal rain formation during thermal non-equilibrium cycles	PELOUZE, Gabriel
