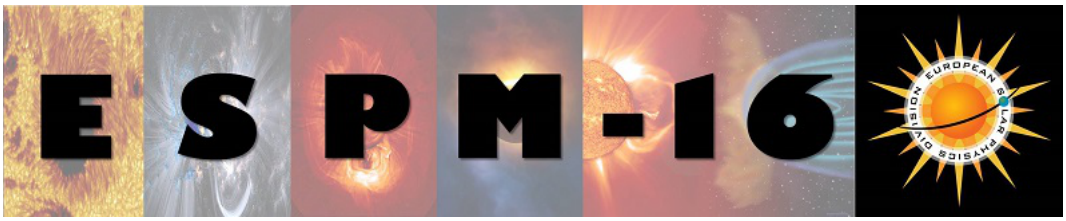
Session Program

Sep 6 – 10, 2021



16th European Solar Physics Meeting

Poster Session 2.3

Online

Mon, September 6

3:30 PM

Poster Session 2.3

Session | **Location:** Online | **Convener:** Georgia Tsiropoula

3:30 – 3:43 PM

Evidence of chromospheric molecular hydrogen emission in a solar flare observed by the IRIS satellite

Speaker
Sargam Mulay

3:43 – 3:56 PM

How common are counter Evershed flows?

Speaker
Sebastián Castellanos Durán

3:56 – 4:09 PM

Prevalence of thermal non-equilibrium over an active region

Speaker
Seray Sahin

4:09 – 4:22 PM

Microwave observations of coronal jets

Speaker
Sergey Anfinogentov

4:22 – 4:35 PM

Turbulence driven by phase-mixed torsional Alfvén waves in nonuniform coronal loops

Speaker
Sergio Díaz Suárez

4:35 – 4:48 PM

Observational Detection of Drift Velocity between Ionized and Neutral Species in Solar Prominences

Speaker
Sergio Javier González Manrique

4:48 – 5:01 PM

How wrong are the results of inverting Fe I lines when NLTE and 3D radiative transfer effects are ignored?

Speaker
Dr H N Smitha

5:01 PM
