

16th European Solar Physics Meeting

Monday, 6 September 2021

Poster Session 2.5 (15:30 - 17:01)

-Conveners: Alessandro Bemporad

time	[id] title	presenter
15:30	[205] Type III solar radio event observations on 22 August 2017 with LOFAR telescope	DABROWSKI, Bartosz
15:43	[461] How connected is the solar atmosphere	Dr PANOS, Brandon
15:56	[239] Flare QPPs in AB Dor: I. Identical scaling laws to solar and stellar flares and clues of magnetoacoustic waves	KALUGODU, Chandrashekhar
16:09	[439] LOFAR observations of fundamental and harmonic type III emission during an M class flare	VOCKS, Christian
16:22	[336] LOFAR observations of a jet-driven piston shock in the low solar corona	MAGUIRE, Ciara
16:35	[501] First Time and Frequency Resolved Imaging Spectroscopy Observations of Solar Radio Spikes	CLARKSON, Daniel
16:48	[144] Flux tubes and energetic particles in Parker Solar Probe orbit 5: magnetic helicity--PVI method and IS \odot IS observations	PECORA, Francesco
