

16th European Solar Physics Meeting

Tuesday, 7 September 2021

Poster Session 4.3 (11:00 - 12:31)

-Conveners: Stefaan Poedts

time	[id] title	presenter
11:00	[328] Propagating localized brightenings in small loop-like structures: Observations from Solar Orbiter/ EUI	MANDAL, Sudip
11:13	[548] Kinetic and magnetic vortices in the solar atmosphere	S. A. SILVA, Suzana
11:26	[222] Five years of observing the solar chromosphere with ALMA - First results and future opportunities	Dr WEDEMEYER, Sven
11:39	[135] The Missing Cool Corona in the Flat Magnetic Field Around Solar Active Regions	SINGH, Talwinder
11:52	[204] A statistical study of plasma composition in solar active regions	Ms MIHAILESCU, Teodora
12:05	[451] How do driving time scales effect energy release in the solar corona?	HOWSON, Thomas
12:18	[474] Effects of spatial resolution on Stokes profiles	MOE, Thore Espedal
