

16th European Solar Physics Meeting

Wednesday, 8 September 2021

Poster Session 6.4 (11:00 - 12:31)

-Conveners: Elena Khomenko

time	[id] title	presenter
11:00	[326] Properties of Uniturbulence in weakly compressible MHD	ISMAYILLI, Rajab
11:13	[269] Observations of nanojets in multi-structures from different drivers: from KHI-driven reconnection in a blowout jet to coronal rain loops	SUKARMADJI, Ramada
11:26	[136] Is phase mixing important in the quiet Sun?	MORTON, Richard
11:39	[179] A Statistical Study of Plasmoids associated with post-CME Current Sheet	Mr PATEL, Ritesh
11:52	[249] The SOLARNET project and the Solar Virtual Observatory (SVO)	Mr VANSINTJAN, Robbe
12:05	[161] Modelling line emission in the transition region	DEL ZANNA, Giulio
12:18	[447] Microwave Oscillations in a solar flare	SHARMA, Rohit
