

Amazon Web Services - SageMaker platform

Thursday, 19 September 2019 10:00 (1 hour)

This talk will illustrate the SageMaker platform from AWS, a Cloud Based MLaaS service that improve, speed up and enhance the deployment and training of machine learning algorithms. The session will be *live*, with a full End-to-end example performed on live screen with the AWS console. This aims at training people on AWS services, especially for the ones offered for machine learning.

Presenter: D'ALESSIO, Federico (Amazon Web Services - Solution Architect)

Session Classification: Session 3: Commercial tools & Cloud
