

SPHERE planet imager: instrument presentation and main results

Monday 17 February 2020 17:20 (25 minutes)

The SPHERE planet imager is now operating at the VLT since five years. I will present here a description of the instrument and of its performance. Moreover I will introduce the data reduction methods needed to extract science result from the instrument data. Finally I will review the main outcome obtained from the instrument in its operativity period.
