Prospects for multi-wavelength polarimetry of blazars

Monday, 29 August 2022 09:05 (30 minutes)

This talk provides a review of prospects for multi-wavelength polarimetry of blazars. This includes inferences from optical spectropolarimetry as well as high-energy polarimetry, with special emphasis on first results from and expectations for IXPE.

Primary author: Prof. BOETTCHER, Markus (North-West University)

Presenter: Prof. BOETTCHER, Markus (North-West University)

Session Classification: Polarization and AGN and blazars
